I don't scam, My Premium is priced high. The only scam i do is Double Dips, But if i feel like they'll be a better customer I'll refund the money.

Going for them long terms gains, I have a guy that has paid me around \$600 Himself. Just Premium + Upsells

You don't have to meetup scam if your SE game is good!

Ps : \$1.7kish made in a week! Looking for ways i can improve from here

Fair, I am obviously gonna move on to CPA or other white hat methods after i have around \$5k which i think is a safe amount to experiment with and fail.

\$3.3k more to go! Personally i can't even tell my parents i am making so much money from ewhoring xD so they aren't aware of it. If i have a white hat business I'll happily share what I am doing and be transparent about it.

It's around 120k in my country, 120k will def help em!

I don't know how the f*ck you make so much money, but for me e-whoring does not work.

I'll go on adult chat sites, post the snapchat ID and people add me, we speak, but they say they don't pay for naked womens, as they are freely available over the web, so yeah, no earnings yet.

What's your SECRET ?

Congrats on your earnings bro !! try not to waste them on stupid shit.. i have one question for you..

how much do you charge for your premium ? or at least what's your minimum price

Blockonome - September 14, 2020, 8:29 am

Wait, how are you doing this with BTC? You literally make them sign up with cryptos or what? :D

Tyr - September 14, 2020, 8:34 am

Very nice. Sometimes it's a hit or miss with e-whoring, but glad to see that it's still profitable for those who have the time! When you're young prior to being able to get a job (even getting a job at 16 and doing it on the side); it's excellent money depending on how good you are at human manipulation and your overall method.

I made almost \$800 doing it one month when I was like 13 and back then that was a lot of money to me, hehe. I did it differently though. There was a site where you could link up with a random person with a webcam and many of them were dudes looking for young chicks to jerk off to and I had a video loop I could edit and shit and basically put to work everything I learned from social engineering when talking to them.

Unfortunately, I became very good at it and now sometimes I find myself doing it to my friends on accident in real life and stuff without even realizing what I did until afterwards.. :s

So wait... You get on Cashapp, and technically, you could cash that out to a bank account from Cashapp?

And also, I see a lot of people trying to request their money back? They get any of it back?

Okay, I am just thinking, because I need to basically make BTC into Cashapp which can then send them to my bank account, so was just wondering if Cashapp is a good way to do this.

Yeah, so I am talking run VPN on computer 1 device fake cashapp account and then run 1 real cashapp account on the phone for real payouts.

Then recieve dollars on the fake cashapp from BTC and then send from that account to my real cashapp account, which I can then cash out immediately after to my bank .
