Thread: [Need customer email scraper bot made - \\$50 BTC + \\$250BTC bonus if what im doing works](#)

?Enlightened - August 14, 2020, 11:38 pm

Hello,

I'm looking for a bot that is able to scan an index with thousands of entries. It needs to visit each listing, go to the website that is within each listing, and find:

- The displayed email (it could be anywhere on the site, most important)
- The contact form URL (if any)
- Any telegram group links (if any)
- Any discord group links (if any)

Emails/links could be in the form of images, so it must be able to detect the URL even if it is not in text format on the site.

If you think you can do this let me know and we will discuss further. It needs to be done within 48 hours from this post. Do not contact me if you think it will take longer because I WILL NOT PAY YOU. Time is money, I don't pay time wasters.

I am willing to pay \$50 BTC upfront, if what I am doing works then i'll include a \$250 bonus. It could take up to a two weeks to find out whether what I'm doing works or not, either way I'll keep you updated.

Thank you

Ever considered back-seat moderating is quite annoying. Especially from you mister "i can do it all".

Yeah, not even a hint of defending your cause. Only direct insults. Kids be kids.
