Thread: [User asks for bytes in order to give popularity](#)

SIM-4747314 - August 15, 2020, 5:00 pm

I don't care for my -5 but user flavoral said in convo to give him 500 bytes and he would remove his negative into positive, is this kind of blackmail allowed?

Now his friends supporting him, better to close this, unfair.

Pretty sure it was a joke and creating a thread crying over it is a terrible idea.

flavoral - August 15, 2020, 5:01 pm

This dude actually took* a convo joke where we all troll each other seriously lmao...

It's all in HF convo, nothing private. Also it's Popularity, which is useless.

500 bytes is a lot....

i have given you my -5 tho

I am aware of this, it's useless, but you blackmailed.

This thread belongs in the lounge, the RANF section is not for troll posts.

Thank you.

That particular little number is meaningless, wouldn't worry too much about it.

Popularity != B-Rating.

Holy shit you are soft.

You're crying over pixels and a point system that literally means nothing
