Do you have any examples of your work?

Do the prices change if the landing page is complex, but doesn't need back-end/api? Couldnt it be ripped in that case?

Because this is more of a premium service, I mostly code for individuals and can't show the design itself since it would reveal their niche. I coded a few landing pages for a few users here and on other forums but due to contract policy, I believe they can't vouch here.

Prices are fixed, if the landing page, or should I say a project is too complicated, for example, a website like Swagbucks, I will let the customer know if it costs more, but the \$300 package should be more than enough to have a proper landing page with many backend functionalities.

If the landing page is complex, it should have some back-end or API involved and that's what I will always suggest to the customer to prevent cloning, without any usage of API or custom back-end all I can do is make cloning harder, but can't fully prevent it.
