Thread: [slot game](#)

SIM-4387328 - August 19, 2020, 12:20 am

is there any algorithm set on slot game?
Because I win in starting and then I start loose

Yeah I think so also in flip. But sometimes the system will gives a losing streak from the beginning and you'll find yourself deficit till the end. :(

feeding the pot and just give a break for a second and someone else comes and hits the jackpot.

I lost a lot jackpot. I was one who user who played it from the start and lost a lot because I'm unaware that playing jackpot 100 is equivalent to 1000. :(. And I'm not a gambler, so I let to lost my bytes. I feel sorry for myself that time :(</3

Bacardi Cola Lime - August 19, 2020, 1:59 am

It just happens OP. After all, casino games are designed to make the house win in the end.

it kind of sucks to loose all the bytes and to next one gets all the bytes in a single play.

BiggL - August 19, 2020, 2:30 am

I've been playing slots a long while and had not much luck with neither the award or bytes lol

Silent hill - August 19, 2020, 4:08 am

yes there is, but you also need luck.
ask my bytes ;)

I haven't tried it out bro, maybe would want even once :D

Lyrarei - August 19, 2020, 4:13 am

I'm pretty sure its random but in a way the you eventually lose in the long run, but have large eventual win spikes.

bluud - August 19, 2020, 4:37 am

With slots, you are guaranteed to lose if you play after you profit.

Astrogen - August 19, 2020, 4:40 am

Yes, do 1 first then set it to max. You will win instantly, don't tell anyone else. ?
Just play for fun and for the award, winning and profiting from it is just luck.

Doing 1 byte spins you get the award within a few hours pretty much guranteed. Watched netflix while I had it on my second monitor and got it pretty quick lol

Also got it in less than 100 spins (forgot exact #) with 1 byte each spin. Was lucky ?

Damn, you got lucky. I think mine was 1k+ spins.

Silent hill - August 19, 2020, 4:49 am

i just did a 200 bytes spin and won 2,400 bytes

i can not argue with that you have luck riding all the way in with you.

you hit 250000 in your first scratch card that's insane.

you must consider yourself lucky mate as opposed to ones overr here who have not won the award even after 2k spins.

Yeah, but that's how the game is played. I can recommend Xerotic for some change of it maybe it better if the jackpot is hidden for others player so that would have no clue how much they would gain if they win.

Maybe you should try it bro it fun to play in the convo.

By the way I try snipping sometimes when the pot become bigger :) . but didn't work so far

SIM-3587630 - August 19, 2020, 4:49 pm

It's called gambling brother, I played slots just to get the award honestly

By the way I try snipping sometimes when the pot become bigger :) . but didn't work so far a command to know how much is in the pot atm before feeding it some bytes would be great.
