Thread: [StrelyCleaner Pro | Anti-Malware Software](#)

fisica638 - August 23, 2020, 10:01 am

StrelyCleaner PRO

This is an anti-malware application built in VB.NET. Detects many malicious .Net malware and malicious scripts.

It stands out in Finding RAT Clients created in .Net.

You currently only have a part of the detection engine that I myself create. therefore, it only detects malware created in .Net.

THE DETECTION ENGINE IS NOT BASED ON SIGNATURES. BUT IT CAN BE EASILY MODIFIED, IT IS FLEXIBLE.

Features

[+] Completely Asynchronous, preventing the application from freezing
[+] The Error Messages and Exceptions are written in a Log in real time. Quick Scan [Done > Completed]

Custom Scan [Done > Completed]

USB Scan [Done > Completed]

Booster [Partially Done]

Startup Manager [Partially Done]

Network Scan [Partially Done]

Engine AV Detection [Incomplete]
