Thread: [Crypting For Free \[limited\] - Bypass Windows 10 Defender Runtime - # support](#)

aliencrypter - August 26, 2020, 11:10 am

Guys, I need friends on this forum, I'm recently registered and I confess that I don't know much here, I have some friends who recommended me and that's all.

I am going to offer EXE cryptography service (Bypass W10 Defender Runtime) for free in next 24 hours, because I am looking for new friends and I need help to establish myself here in this forum, I believe I can add a lot of content here as you do , so I come here humbly saying, call me at Convo if you are interested, I will not charge you for it, I will do this only once per person.

I have compatibility with .net and native files, the output will be obvious .net, and it will not be 100% fud, I will provide the scan for free as well.

I could leave my Discord here but I don't know if it's allowed, so better not, if you know please answer. ?

How no one repiled me in another thread, then i will put video proof here, that's my last try.
