Thread: [\[REQ\] Logo for a charity/humanity project \[REQ\]](#)

Bull Knows Best - August 27, 2020, 12:30 pm

I am starting a project and a crowdfunding page for this project and I am in need of a logo.

The name of the project:

Project Aruga

Project Aruga is going to be a 14 day event that me and my friend are going to stay in the worst slums of the Philippines to document and record just how bad the conditions are. We hope to make this a series where we go to other parts of the world (third world countries) to experience and document how bad it is because a lot of people are oblivious to just how bad it really is, all while we do our part to raise awareness and donate to help their communities.

So at this point it is at the very beginning stages. I know I need some kind of logo/graphic so that way I can use it for the funding page. Once this project gets funded, I have no problem using some of the marketing/promoting expense to give a tip to whoever tackles this. I appreciate any help with this and anything anyone can come up with. I just hope the background is a .png and is transparent. I was thinking of including the name in the graphic but possibly include a homeless filipino child reaching their hand out, maybe with a Philippines flag in it somewhere? I don't know. If anything, I would want the child to be drawn in, so it doesn't have to be an actual photo of a kid. These are just little things I was thinking about. I am really just in the beginning stages so with these details, but I am excited to see what someone comes up with. I really am not picky so if someone does want to just take the details and come up with something entirely in their mind, I would love to see it!

Thanks a bunch in advance!
