Thread: [Google App / Play Store Review | Google Business Reviews \(Positive or Negative\)](#)

**Prodigious** - August 29, 2020, 9:45 am

Hello everyone,

I've been taking on a service for google play store reviews and business reviews.

Custom written reviews tailored to your platform.

\$5 / Review + upvote/downvotes on other reviews.

\$300 / 100 Reviews + upvotes/downvotes on other reviews. (\$3 / review)

Positive or Negative Available

Terms:

I prefer to spread a high number of reviews over the course of a week-month, maybe longer, depending on the amount of reviews.

Whatever time and amount agreed upon, you accept there will be no refunds. Your ordered will be either fulfilled or cancelled.

These accounts are mostly aged, with some newer ones mixed in.

\*\*\*Unique private IP's are attached to each account for better stealth.

You can write the reviews if you want for a possibly cheaper price.

Thanks for your time!

If you are looking for other google services, let me know.

Still offering this. Capable over 1k+ reviews.

Custom IP (not public proxy) for each account and review.

92% of consumers now read online reviews vs. 88% in 2014

40% of consumers form an opinion by reading just one to three reviews

I can boost reddit posts with upvotes and comments.  
Post reviews to glassdoor, indeed, bbb, and any other review website.

Right now I have a line of most of those already started for a few clients.  
So figure I'll offer here for some extra \$\$\$.

We can discuss prices in PM and create a contract.  
Let's do business.

Sounds good man, still offering this service.

I can do google business reviews, google app reviews, apple app reviews, and more!

I've just broken into the apple side of things. I figured out a way to do mass Apple app store ratings.

Once again, all my IP's come from an active botnet.  
(REAL COMPUTER, no VPNS!)

Browser configurations are unique each post to further look REAL.

Each sessions Cache is destroyed upon posting. No 2 sessions are alike.

Along with a few private techniques to make sure the process is working.

You can't go wrong using this service. Get a wider audience by having great reviews!

I'm sorry, i don't use skype, i have discord and tele.

Also update on thread:

Updating my stocks now. Acquiring more private ip's and time developed accounts.

Interested, however what I'm more interested in is account names as these need to be English common names, also if someone looks deeper into the history of reviews of that person what will they find?

All real names are used. Generated from real names. If you look into the history of reviews, will probably find more reviews. I can use brand'ish accounts. Or accounts that have a few reviews already.

Can do a variety of ways.

Is this service still available? Is there any option to remove the negative reviews if asked?

hello, yes this is still available. Do you mean remove the negative reviews after they've been sent? Def possible i believe. Never had someone ask for it though.
