Thread: [A quick tip for all you CashApp users.](#)

Angela White - September 1, 2020, 7:21 am

if you want to cash your cashapp out to your bank but don't want to pay the full fee (like \$2.70 for \$105), click "standard transfer" instead of instant to waive the fees. then go to your recent payments tab, and click the "get it now" button under your "Pending" tab (the cash out)

it will now ask you if you want to instantly cash out to your bank again, but now with up to 50% less fees for the instant transfer because they're begging you for even a sliver of the money as that's how cashapp makes any money at all (through instant transfers), so if you say no to the first fee they start offering you lower fees.

do as you wish with this HQ information.

just turned my \$2.70 instant cashout fee to \$1.58

Definitely a good tip to note.

BangBang - September 1, 2020, 3:46 pm

is the cash out really instant?

Money Man - September 1, 2020, 3:54 pm

good tip appreciated brother
