Put it in the incubator and see which HUM you are going to get. I can teach you some basics if you are interested in playing the game.

You can't sell it for bytes in the lottery because you're not ub3r, so you either let the egg die or put it into the incubator and see what hum you get.

jecoylecroy - September 1, 2020, 10:14 pm

Place it in incubator then feed it with bytes. Power up it with same eggs then attacked other hakuman OP.

Deany - September 1, 2020, 10:16 pm

Play game or let it die of course

You've got 2 eggs on your account now.

Go hatched them and grind more eggs for feeding to make it more tougher.

I am grinding for another Sapphire today :D

Ruby consumes more bytes than emerald :(, but I had to hatch it maybe tomorrow but I had to hum up 1 at a time so that I can hide it.

Yeah but it's much more powerful and with that you can get more kills compares to the hums from emerald egg :D

If you got a freagle out of your emerald that would be fine but if others then hums from ruby eggs is much better.

So while earning brother look for some other ways where you can learn and earn even a little for start, eventually when you master what you have learn it will give you more income :D
