bluud - September 1, 2020, 12:54 pm

I probably fart at least 3 times a day.

Bacardi Cola Lime - September 1, 2020, 2:01 pm

You don't want to be in the same room with me if I've had protein shakes and fiber rich meals.

Deany - September 1, 2020, 2:10 pm

No. Only before I need to take a dump. Farts are basically warning signs for that reason

On a good day, 8-12 times. How about you?

dave soiutig - September 1, 2020, 3:23 pm

No such thing as farting too much. Farting too little would be worrying. Savour the flavour, people.

jecoylecoy - September 1, 2020, 5:33 pm

Having a fart is healthy for the body :).

Geass - September 1, 2020, 6:01 pm

I wish I could disagree with you about the beta male part. Your fart fetish is weird tho.

Xtreme™ - September 1, 2020, 10:24 pm

Why would you count your farts in the first place lol.

Regularly farting is normal, even healthy. Farting a lot isn't necessarily bad, but it could be a sign of a digestive issue or improper diet.

I will be starting to count it and I will let you know.

Does it really matters to you how many times does an individual farts a day?

I don't think I have that problem, I use Vegan Protein Shakes with high fiber, I guess I can control myself better than most haha.

Brother, I fart silently.... So even I am next to my GF, she would only notice it about 2/10 times, when I fart and I do not care. I tell her I need to get the gas out xD

Farting and shitting is the only way to find out you are not healthy.

the more you do the less healthy you are period.
