Thread: [WebMonitor RAT \[PC + Android, Keylogger \(No root\), C++, No PORTFORWARD\] #1 ON MARKET](#)

Revcode - September 4, 2020, 5:20 am

[/3kcXKnt\]](#)

GUI Preview

[/3kcXKnt\]](#)

Demonstration video coming soon.

Additional information:

Note: WebMonitor RAT is extremely easy to setup. Unlike any other RAT on the market, you don't have to download or

install anything, no need to portforward any port (works anywhere you live) nor deal with complicated IP/DNS/Network settings. WebMonitor can be

used in less than 2 minutes!

WebMonitor uses a different approach, giving you maximum freedom to use it from anywhere and any device, without having to worry about hardware

locked software.

WebMonitor is a fully native RAT, meaning it has 0 dependencies (no .NET) and will run on ALL Windows systems and

languages starting from Windows XP and up.

WebMonitor's interface is fully managed from a web page which you will get access to automatically after completed payment.

This means, you may manage your clients from a phone, tablet or PC, as long as you can open a web browser.

WebMonitor is simply the perfect parental control and employee monitoring tool!

Our mission is simply to deliver powerful, stable and fast services with dynamism, where end users may enjoy all of our services within their own

web-browser from any device.

This contributes to maximum freedom by not having to install heavy software and encounter hassle with unnecessary complex configurations.

The advantages of our concept outweighs software-based remote administration services by far.

With a rapidly increasing company and customer satisfaction rate, we are confident to satisfy anyone ranging from home-users to the most advanced

IT professionals looking for premium quality remote administration services.

You will also receive free access to our VPN servers. Privacy is our priority, so no logs are saved on our servers.

Once again, no software needed to be downloaded. Everything is done from the web browser using your PC, Phone or Tablet, meaning you can do this

anywhere, even while on 3G, 4G or WiFi anywhere you are.

FAQ:

- How can I signup?

The signup takes place during the order process.

- Where can I read more about complete features?

[/3fq65k0\]](#)Click here to see a complete list of features

- Which payment methods are available?

Paypal, Credit Card and Crypto coins.

- For how long is my license valid?

All subscriptions are either 12 or 6 months, so a new payment is required once your license expires if you wish to keep using the service.

- How long will it take after the payment is completed until I get my login credentials?

Your account is created instantly. Your login credentials are sent per mail, which usually takes not more than 5 minutes

- I'm getting a red error during payment.

This means we cannot accept your payment at that moment. Make sure you do not use a proxy/vpn or similar.

- How are refunds handled?

If you do want to open a dispute, please go to "Tickets" under the "My Account" section and create a ticket regarding your case.

- How is my data secured on the server?

Each users files are stored using AES-256 with a key that that only can be obtained from another AES-256 encrypted container. Decryption happens

at run-time.

- How is the data traffic from one machine to the server secured?

WebMonitor is currently using an implementation of AES-256, a classic Diffie Hellman handshake plus SSL.

- How is the data traffic from the server to my browser secured?

In order to effectively prevent users from man-in-the-middle attacks WebMonitor is shipped with SSL.

- Are my data readable by anyone except me?

The short answer: As long as you keep your PIN safe, no one, not even we will be able to read any of your Monitors data. Your PIN is sent once

only at the creation of your WebMonitor panel.

- What if I loose my PIN?

Your data are lost. We can reset your account to a new PIN that will however make all of your previously stored data unreadable.

- Which browsers are recommended?

For best performance we recommend to use Chrome/Opera.

Hello,

I was looking for a RAT for Android.

I would like to see all Whatsapp/messenger conversation. Is it possible with this rat ?

I see that i can found the bdd but it's encrypted.

SoftPatch - September 19, 2020, 9:43 am

(Sep 19, 2020 09:18 AM)Anywhere Wrote: [\[CITE\]](#) Hello,

WebMonitor has a keylogger, so technically you can read anything typed on the phone.

There is also a notification reader which reads incoming messages from any app.

real plug - September 20, 2020, 6:45 pm

1. do i need vpn to use this ? i see you did mention a free vpn on the thread
2. is it silent install or needs admin Permission to execute ?

SoftPatch - September 21, 2020, 3:12 pm

(Sep 20, 2020 06:45 PM)real plug Wrote: [\[CITE\]](#) 1. do i need vpn to use this ? i see you did mention a free vpn on the thread

2. is it silent install or needs admin Permission to execute ?

1. No. But you will get access to our private VPN for free anyway.

2. It will request administrative privileges to run, but you can disable this if it interferes with your business. Have a look here:

<https://revcode.se/knowledgebase/how-to-disable-the-uac-user-account-control-notification/>

ohmyloveforever - September 23, 2020, 2:11 am

Does Webmoniter has a binder to run other executable files at the client setup time?

So can I hide new incoming sms from the phone owner?

W1NK1LL3RX - October 1, 2020, 7:26 am

I have been using WebMonitor PC + Android (Ultimate) for over 2 years now. By far the easiest RAT to use and very n00b friendly if it's your first time using this. The server builder is very simple, it literally takes just click, build, save and done! The advantage of having the RATs interface accessible via browser is a game changer. Tested and works well on chrome, safari, mozilla and explorer.

The webcam, screenshot, keylogger, password recovery and SMS loggers work very well on PC and Android. The file explorer is very easy to navigate through the file system. Being that's its a cross platform RAT, is amazing and all your need is a web browser to access it.

This is the only RAT I use to do the fact it has a nice layout, easy to use, it's cross platform and you can access it with just a browser.

I definitely recommend this to anyone!

labbepierre1 - October 2, 2020, 1:51 am

hello , please post me (pm) video demo :)

BT_Devil - October 2, 2020, 3:52 am

I need help. I generated and installed the apk on a android samsung and it is showing on the web monitor data traffic but not report is coming and all the notifications are set properly on the android phone. What is wrong?

Anywhere - October 4, 2020, 8:13 am

Hello,

The computer agent works.

But when i tried the android agent on my phone, install it and launch it, i cannot see it on webmonitor.

Could you tell me what to do ?

Thank you.

manbearpig86 - October 4, 2020, 9:36 am

Hi, I had a few questions I wanted to ask:

- 1) After installing this app, what are the IP addresses I might need to whitelist in the firewall?
- 2) Can I remotely disable USB ports? If yes, how?
- 3) Is the connection etc completely secure and only I will have access to the PC?

slipperyknick - October 5, 2020, 5:39 pm

Ive purchased and have been using this product for about a month now, and as far as stability and being user-friendly, it is great!

Only issue is, there doesnt seem to be a way to enable "On-Connect Tasks" for new clients. Is this something that is just not implemented, or am i blind and am just missing it?

Thanks for your time, looking forward to a prompt response!

Revcode - October 5, 2020, 7:10 pm

(Oct 4, 2020 09:36 AM)manbearpig86 Wrote: [\[CITE\]](#) Hi, I had a few questions I wanted to ask:

 - 2) Can I remotely disable USB ports? If yes, how?
 - 3) Is the connection etc completely secure and only I will have access to the PC?
- 1) WebMonitor is extremely easy to use and doesn't require any configuration from your end, hence no IP addresses are be whitelisted.
- 2) It may be possible, depending on the privileges by which the WebMonitor agent is running. Given it's running with administrative privileges, you may execute relevant shell commands from the "Remote Shell" feature, or upload and execute a third party application to accomplish this from the "File Browser" feature.
- 3) All connections from and to WebMonitor are encrypted with SSL.
- The entire infrastructure of Revcode and its services are constructed with focus on privacy and security.

Revcode doesn't log any activity of it's customers. Here is a link to the Privacy policy:

All crypters supporting native executables should work.

Camarade - October 6, 2020, 3:17 pm

Hello !

Do you have a Windows Defender system so that the software automatically enters exceptions or automatically deactivates windows defender?

Fares T - October 7, 2020, 1:33 am

EDIT: Thanks, it was fixed, is Perfect Money still available as a payment method?

I'm trying to purchase the new version but everytime I try to checkout on your website I get an error

<http://prntscr.com/uuljri>

"There has been a critical error on your website."

I have a renewal for only 79Eur, is this for the same version? I can't empty the cart or access it, I need to renew my subscription

sean_007_ - October 11, 2020, 9:13 am

Please check your support mail.

<https://prnt.sc/ux7kdv>

altosc - October 11, 2020, 10:57 pm

I have previously used the Android edition of WebMonitor, and have just upgraded to the PC edition. I highly recommend both products for their superior features, ease of use and active support.

Fares T - October 12, 2020, 5:56 am

Great support, just renewed my subscription for another year, the Ultimate version is great, very easy to use and user-friendly, no need for portforwarding, I've used the Webmonitor PC for a year now and it has been very stable, their credential tool never failed to work. and their support is great unlike other RAT developers here on HF...

I've just started using the Android webmonitor even though I've had it for a year now, Its very useful and theres ALOT of features, very good app.

Very recommended for both PC and Android.

Marketplace - October 16, 2020, 10:25 am

Does the android version enable you to send messages too?

If so:

Is the .apk undetectable by antivirus on PC? Can you provide a scan?

You seem rather busy so take your time to reply and once you do, I'll be happy to purchase! Thanks

snaxx - October 17, 2020, 2:39 am

Any plans to expand to MacOS?

mrhubba - October 17, 2020, 12:04 pm

I would like to see scan from virustotal if possible, also is it hard to delete app from android? I mean , after install does it works in "shadow" or can be seen in app list?

SoftPatch - October 17, 2020, 1:35 pm

(Oct 17, 2020 12:04 PM)mrhubba Wrote: [\[CITE\]](#) I would like to see scan from virustotal if possible, also is it hard to delete app from android? I mean , after install does it works in "shadow" or can be seen in app list?

It can be seen in app list from settings as "app".

Wheezy Gang - October 17, 2020, 11:58 pm

You don't by chance also support iPhone do you? Just androids

BenGassi - October 18, 2020, 7:38 pm

Hey WebMonitor support Android 10 ?

THORNE - October 19, 2020, 1:19 am

Does the android keylogger / notifications work for app like Instagram and Snapchat?

Vagabundo Legendario - October 22, 2020, 5:38 am

Demo video pls , I want to buy but first I want to see allí the features thanks

jhonzibit - October 22, 2020, 12:03 pm

does it got a binder?

does it get detect by play protect or something?

does it work on android 8.0.0 and above?

can i install it on ws 2012?

pm please

SoftPatch - October 22, 2020, 3:40 pm

pm please

WebMonitor doesn't include a binder.

It gets detected by Play Protect now and then. These false-positive detections are sometimes removed following new updates of the WebMonitot apk.

It works on all Android platforms, starting from 5 and up. The Windows edition of WebMonitor can be installed on ws 12.

(Oct 22, 2020 05:38 AM)Vagabundo Legendario Wrote: [\[CITE\]](#) Demo video pls , I want to buy but

Hgmt - October 24, 2020, 6:05 am

Im interested in android monitor. Is it working on latest android version and Samsung S20?

redtube prod - October 24, 2020, 7:05 am

Does it work on Samsung galaxy s9? You said it gets detected by play protect, is there a way to disable that app?

SoftPatch - October 24, 2020, 4:11 pm

(Oct 24, 2020 07:05 AM)redtube prod Wrote: [\[CITE\]](#) Does it work on Samsung galaxy s9? You said it gets detected by play protect, is there a way to disable that app?

Yes it works on all Android phones and tablets starting from 5 and up.

The brand is not really relevant as long as the platform is Android.

Instructions and illustrations are included so that you may operate WebMonitor with ease.

redtube prod - October 25, 2020, 9:10 pm

I just brought it, followed the steps and when I open my own phone s8 with it downloaded on it, it's just a white screen could I please get help

SoftPatch - October 25, 2020, 10:03 pm

(Oct 25, 2020 09:10 PM)redtube prod Wrote: [\[CITE\]](#) I just brought it, followed the steps and when I open my own phone s8 with it downloaded on it, it's just a white screen could I please get help

You submit a ticket for support on revcode.se.

Support is not provided in the sales thread.

Kosaq - October 29, 2020, 2:52 am

Is scantime and runtime FUD?

Dystopia - October 29, 2020, 10:41 am

this rat looks perfect for the features it's offering.

I'll probably order one soon.

separatista - November 11, 2020, 2:08 pm

When it gets detected by play protect, does it get removed?

separatista - November 17, 2020, 11:15 am

Does this tool work for android 10 and android 11?

electrumhvh - November 17, 2020, 3:15 pm

Amazing! One of the best tools I have used!

drewkasp - November 19, 2020, 3:36 am

Does it need to be crypted to work or it comes FUD?

chadasause - November 20, 2020, 4:10 pm

Is webmonitor lite gone? All im getting is the screen for Ultimate and i kinda liked lite better.

Trubnut67 - November 21, 2020, 2:03 pm

As above, ultimate doesn't work for me at all, just freezes/crashes. please please bring back the other dashboard

LordDragon - November 22, 2020, 2:30 pm

Is this still working or not?

Trubnut67 - November 24, 2020, 5:19 am

Just need to say, my issue was user related. The ultimate dashboard requires you to use executables from the ultimate dashboard and I was using them from the old dashboard.

Support staff replied to my help ticket within 24hr and got me back up and running :-)

SoftPatch - November 24, 2020, 1:57 pm

(Nov 22, 2020 03:30 PM)LordDragon Wrote: [\[CITE\]](#) Is this still working or not?

Yes, it's still working.

aerohacker - November 27, 2020, 1:32 pm

1) I won't need any PortForwarding, VPN or DNS?

2) It's all based on web browser? I just need access and use my login and password?

3) Which Crypter it's recommend to use?

4) Can I use HRDP or HVNC?

Protocol - November 28, 2020, 5:23 am

Hi, do you plan to make lifetime licenses?

Nobody - November 28, 2020, 9:33 am

I've just switched to a mac, maybe I will test this out. The problem is I can only crypt .NET files. Do you have any crypter recommendations?

LipusX - November 28, 2020, 11:48 am

PM me your discord or telegram or whatever? Thanks

chuksthedon - December 1, 2020, 5:46 pm

Hello Mate

Please can you dm me for some private conversations

Fortnite - January 16, 2021, 3:21 am

Is the crypter needed for the android client? If so, which one do you recommend?

cosmi - January 19, 2021, 1:03 pm

I can download and execute on pc ? Another files?

Output error on PC "This application is not compatible with remote desktop sessions"

portmap34 - February 11, 2021, 8:38 am

Mr14 - February 17, 2021, 12:49 pm

Bought it (Android Version)

Panel doesnt work. It shows the connection, but no functions are working for android.
Already wrote support ticket. Waiting

Trev - February 18, 2021, 11:29 am

what crypters are compatible with this?

Trev - February 19, 2021, 1:26 pm

Is this product even still active?

Derpplox - February 25, 2021, 1:35 am

Looks promising. Is a Crypter needed?

niiarmah - February 25, 2021, 8:57 am

This is the best RAT I've used. It's coded in C++ and comes as a native file, no need of installing any form of dependency like Net framework or Java. I don't usually make reviews on softwares but I'm very satisfied with this product. The most interesting part is that I don't have to go through the stress of port-forwarding. The GUI is clean and simple and It's stable and very easy to use. I had a little challenge finding the right crypter for it and I discovered that cassandra crypter works on it.

I love the android version too, I've tested it on different android phones and I love it, it's stable as well. The support was very helpful when I reached out to them. I sincerely endorse and recommend this RAT

iblis - February 26, 2021, 10:21 am

How can i remove the App icon ? It is visibile...

Additional information:

Note: WebMonitor RAT is extremely easy to setup. Unlike any other RAT on the market, you don't have to download or

install anything, no need to portforward any port (works anywhere you live) nor deal with complicated IP/DNS/Network settings. WebMonitor can be

used in less than 2 minutes!

WebMonitor uses a different approach, giving you maximum freedom to use it from anywhere and any device, without having to worry about hardware

locked software.

WebMonitor is a fully native RAT, meaning it has 0 dependencies (no .NET) and will run on ALL Windows systems and

languages starting from Windows XP and up.

WebMonitor's interface is fully managed from a web page which you will get access to automatically after completed payment.

This means, you may manage your clients from a phone, tablet or PC, as long as you can open a web browser.

WebMonitor is simply the perfect parental control and employee monitoring tool!

Our mission is simply to deliver powerful, stable and fast services with dynamism, where end users may enjoy all of our services within their own

web-browser from any device.

This contributes to maximum freedom by not having to install heavy software and encounter hassle with unnecessary complex configurations.

The advantages of our concept outweighs software-based remote administration services by far.

With a rapidly increasing company and customer satisfaction rate, we are confident to satisfy anyone ranging from home-users to the most advanced

IT professionals looking for premium quality remote administration services.

You will also receive free access to our VPN servers. Privacy is our priority, so no logs are saved on our servers.

Once again, no software needed to be downloaded. Everything is done from the web browser using your PC, Phone or Tablet, meaning you can do this

anywhere, even while on 3G, 4G or WiFi anywhere you are.

[/3dWPHYn\]Click here to try now](#)

If you encounter any problems during purchasing PM me or contact us at our support email and we'll get it solved.

FAQ:

- How can I signup?

The signup takes place during the order process.

- Where can I read more about complete features?

[/3fq65kQ\]Click here to see a complete list of features](#)

- Which payment methods are available?

Paypal, Credit Card and Crypto coins.

- For how long is my license valid?

All subscriptions are either 12 or 6 months, so a new payment is required once your license expires if you wish to keep using the service.

- How long will it take after the payment is completed until I get my login credentials?

Your account is created instantly. Your login credentials are sent per mail, which usually takes not more than 5 minutes

- I'm getting a rederror during payment.

This means we cannot accept your payment at that moment. Make sure you do not use a proxy/vpn or similar.

- How are refunds handled?

If you do want to open a dispute, please go to "Tickets" under the "My Account" section and create a ticket regarding your case.

- How is my data secured on the server?

Each users files are stored using AES-256 with a key that that only can be obtained from another AES-256 encrypted container. Decryption happens

at run-time.

- How is the data traffic from one machine to the server secured?

WebMonitor is currently using an implementation of AES-256, a classic Diffie Hellman handshake plus SSL.

- How is the data traffic from the server to my browser secured?

In order to effectively prevent users from man-in-the-middle attacks WebMonitor is shipped with SSL.

- Are my data readable by anyone except me?

The short answer: As long as you keep your PIN safe, no one, not even we will be able to read any of your Monitors data. Your PIN is sent once

only at the creation of your WebMonitor panel.

- What if I loose my PIN?

Your data are lost. We can reset your account to a new PIN that will however make all of your previously stored data unreadable.

- Which browsers are recommended?

For best performance we recommend to use Chrome/Opera.

Visit [/31gIYmW\]revcode.se](#) for more information

Referral program: Available now. Earn up to 25% credits worth of the purchase of the referred person.

Hi,

i just open one ticket.

I had this product 2 years ago and i want to buy it again.
But i need a reset on Login panel.
Thanks

HappyCEO - May 4, 2021, 4:55 pm

I really liked how easy it was to use this product. no port forward or anything. my only issue with webmonitor was that i could not download files about larger than 30-50 mb from clients to my pc. other than that it was really easy to use.

MilitantRat - May 6, 2021, 6:00 pm

I try to use one of WebMonitor's verified crypters AspireCrypt, it says I'm running a VM and wont start on 2 separate physical machines.

<https://i.imgur.com/xP0wDz8.png>

Anyone know a good crypter for WebMonitor?

hazbot77 - May 6, 2021, 8:42 pm

Anyone know a good crypter for WebMonitor?

Nothing has been abandoned. We just got a new sticky in this section for our thread.

Support is provided via tickets on the website, not in this thread.

sergio_nunes - May 11, 2021, 2:25 am

Hi,
I dont remember my password/pin from Login pannel. I just open a ticket.
Thank you.

Hi,
I forget my Lpgin pannel credentials "password/pin" and open a ticket.
Theres any good crypter for Android version?

This is my 3rd purchase and im very happy with it,just give waht it promisses!

Thank you.

sergio_nunes - May 13, 2021, 11:15 am

What happen with the website?
I get an error "502 bad gateway".

outlove - May 14, 2021, 5:33 pm

Hi, it's work now? I very need that

Ibrahimlouis - May 14, 2021, 7:44 pm

Hi please did the android side features work well?

7508626403 - May 22, 2021, 12:04 pm

I purchased this recently. It works like a charm.

UI is pretty clean

No need to port forward.(Main reason for purchasing this RAT)

Works for both Windows and android.

sunnybhasin.sb - May 23, 2021, 4:06 pm

I bought his service and its working good on both android and pc...

i like the seller...

Ifrit - May 26, 2021, 11:09 am

Renewing my subscription again. Actually really easy to use.

Best thing is you can log in to your panel on any device and always know what is your employee or anyone else doing at your pcs.

avelwork - May 27, 2021, 7:19 am

what if i have an account but i lost my PIN code and want to restore it to get back my data? can i brute force it? (its not a lot only 10,000) if no, what is my limitation? i don't want you to block my account if i try too much

btw i have my password it's not a problem only the PIN code
thank you

why is it still on sales page then? Take this down.

elzoz - July 26, 2022, 7:43 pm

Does it support android 12?
