Thread: [Best social media platform for creating a huge page?](#)

Check The Name - September 4, 2020, 7:09 am

Hi, which social media platform is the best for trying to create a huge page without too much hassle? I'd like to eventually profit off of it of course. ?

There's no way to do it with little to no hassle, especially if you want an active big account. If you want the most profit, you should establish an account on; Instagram, Twitter & TikTok. In my opinion, these 3 platforms are the top dogs right now. Any social media platform is gonna require the right amount of work & effort if you want it to be profitable.

Personally I would just because I find it easier to grow & it's easy to bring Twitter users over to FB, IG, etc. then it is to bring Facebook users to other platforms. Only because Twitter users most likely have most other social medias.

I'd say TikTok is extremely easy right now. Second would be IG for sure.

Hmm.

Can we get some more responses please? Thank you so far!

Instagram or YouTube.

No other social networks will be worth it in 2021.

Twitter and instagram and tiktok if you can make videos for the niche

Are you talking about using any bots to gain followers (not fake followers) or you want everything to happen naturally?

Everything would happen naturally.

Either Facebook or Twitter for blogs, the Youtube for podcasts about your page is great to use but prepare for the hard work and sleepless days to do so.

I think the best option so far is Instagram, or Tik Tok if your content is clip-based. But Instagram has a lot of potential if you know how to exploit good images from your niche and then approach brands to advertise them on your account.

Depends on your niche. Tik Tok is absolutely blowing up right now, however I would take Facebook

advertising for a business over Tik Tok any day though but like I said it all depends on what your target audience is.

It depends on your approach

Organic or automated?
