Thread: [Access iPhone Contacts/WhatsApp/iCloud](#)

mason001 - September 4, 2020, 3:45 pm

Hi all, is there any way i can access an iCloud account getting around the 2FA? I've got the email and password but no access to the device in question.

I basically need to get one specific contact from the device, if I could get access to WhatsApp messages also - that would be a massive bonus. I've tried using an IOS Data Recovery program on the laptop the phone is usually backed up on but it hasn't been backed up for nearly a year and the contact wasn't there at that point.

Willing to pay, i'm desperate!

Thanks in advance..

Thanks! And if I may give you free advice.

Take your time to read the [Help Docs](#), because an honest mistake might end up in a temporarily ban.
