He means your shadow banned.

[BRAND NAME REMOVED] not only bans the accounts but they often shadow ban the devices you use/ip.

There are only so many variables one can change.. device ID, IP, photos, bio etc. using an emulator offers no exclusive variables that an android phone you root/ hard reset, and make new accounts on does not. The fact you used blue stacks has nothing to do with it

Have you changed anything from where you were getting more likes?
