Thread: [AES encryption/decryption C++](#)

TarikBrt69 - September 6, 2020, 11:15 am

Can anyone give source for AES encryption with good documentation?

Thank you in advance.

Charger - September 6, 2020, 11:17 am

There's tons on GitHub. Google it

Yes, of course.

Since this is hf and there is a lot people with expereince who can tell which one is best.

I created a small wrapper library for AES/CBC encryption/decryption that makes use of the Crypto++ library. I added some documentation in the README to explain a little bit about it. Hope it helps:
<https://github.com/CristianCanedo/AesEncryption>
