Nalright - September 7, 2020, 10:27 am

Fucking scary service right here. Do you have any examples that you have made? Maybe make someone saying your HF name?

campusminger - September 7, 2020, 10:34 am

damnn .

this is first lmao

would love to see a demo of your service.

skidhackz - September 7, 2020, 10:48 am

(Sep 7, 2020 10:27 AM)illadelph Wrote: [\[CITE\]](#) fugging scary service right here. Do you have any examples that you have made? Maybe make someone saying your HF name?

It doesn't work that way although soon it will be possible. Now you can take whatever video you want and swap the target's face with whatever face you want.

(Sep 7, 2020 10:34 AM)campusminger Wrote: [\[CITE\]](#) damnn .

would love to see a demo of your service.

Maybe it's time to create a sample that I can post in public because all of my requests are porn lol I did a swap of my face with Galifianakis but I can't show that either.

I'm gonna make a few seconds video to post here as a sample, any suggestions? I am finishing my current project and I'll make it.

Check The Name - September 7, 2020, 3:02 pm

Yeah, I'd like to see this as well.

Nalright - September 7, 2020, 3:11 pm

Can you put my dog on a cartoon characters face?

SIM-1729678 - September 7, 2020, 3:11 pm

Cross-posting is not allowed. Keep it to 1 thread please.

<https://hackforums.net/showthread.php?tid=6090559>

Professional27 - September 7, 2020, 3:11 pm

Posting here to keep myself updated on your thread. Waiting for a sample of your work, I could have an entire niche for your service if its up to par.

Cheers and Good luck with your thread.

Shutdown - September 7, 2020, 4:03 pm

Can you make a deepfake of me and my buddy? Changing him to selenagomez to make it seem like i have a girlfriend

Jk

Unless... lol but on a serious note made a post here cause it seems intresting and to keep myself updated

GLWS

<https://hackforums.net/showthread.php?tid=6090559>

I forgot to close the other thread.Thanks

This software can morph the face between 2 people and it's better if there is some similarity, especially on the shape of the face.I seriously doubt it can change a man's face to a woman's but good idea ?

campusminger - September 9, 2020, 10:08 am

Would be great, just a small 5-10 sec clip if that's cool. Because this does sound kinda scary and good lmao

Will look forward to that sample.

Markovnikov - September 9, 2020, 8:56 pm

Interested to see the sample when you get it posted.

zaaz89 - September 9, 2020, 11:17 pm

Interested in sample aswell

10000days - September 10, 2020, 5:58 pm

Are you using DeepFaceLab for this?

<https://github.com/iperov/DeepFaceLab>

skidhackz - September 14, 2020, 8:03 am

I'm starting the sample now

(Sep 10, 2020 05:58 PM)10000days Wrote: [\[CITE\]](#) Are you using DeepFaceLab for this?

<https://github.com/iperov/DeepFaceLab>

Yes

skidhackz - September 17, 2020, 3:18 am

I had to finish it off earlier because I had an order.It's fine mostly, the clarity of picture, the eyes

position and the edges would be improved with 10-20% more training.I will update it at some time during the week.

I found a blonde ASMR "artist" and I replaced her with Margot Robbie.

Deepfake:

Wayne - September 17, 2020, 3:22 am

Your 300x10000 thread design takes a bit to load
Maybe you should consider lowering the resolution?

I-GANK-I - September 17, 2020, 7:37 am

This is sick, i am posting here to get this soon!
Meanwhile GLWS!!

Tyr - September 17, 2020, 7:39 am

Agreed, or just reformatting the text resolution and font. Nonetheless this looks super interesting, I am pretty curious to see how this turns out. You're going to laugh but what if you added animals like dogs and cats and stuff too and released it as a mobile application. That would sell so fast in the Google/App store imo. I know I'd buy it! GLWS!

Good idea actually but this is not going to run on phones.For phones it would need some kind of cloud system to do the work and also I'm not a smartphone programmer :P

Thanks bro

I figured, even for an app developer that is an extremely resource heavy project haha. Your thread only gave me the idea, but maybe one day in the future you can partner up with someone who's a mobile app dev. It just popped up in my head, I think that would be very successful and rewarding for you depending on how much time is going to be involved.

Money- - September 17, 2020, 8:21 am

Looks interesting. Will come back to this.

Silkroad - September 17, 2020, 8:29 am

Original video:

Deepfake:

Damn that's pretty good lol I was not expecting that.

It's kinda scary for the future to be honest, in a couple of years people are gonna fake so many videos.

skidhackz - September 17, 2020, 8:30 am

That's true.And it only needs a few hours/days of something fake for a politician for example to cause riots and then the truth won't matter.It's quite scary.

The video I uploaded will get noticeably better though, keep an eye on the thread, I will update it the following days.

skidhackz - September 18, 2020, 10:03 am

And here is the final video:

skidhackz - October 4, 2020, 4:28 pm

I have increased face resolution about 1.5x since I created this thread.Training time has increased a bit but now face has superior clarity and retains details even in up-close shots.

M100 - October 7, 2020, 12:45 pm

Looks interesting. Going to try your service soon.

skidhackz - October 7, 2020, 1:12 pm

(Oct 7, 2020 12:45 PM)M100 Wrote: [\[CITE\]](#) Looks interesting. Going to try your service soon.

Thanks, I'll gladly do your fake ;)

Injun Joe - October 10, 2020, 11:24 am

(Sep 18, 2020 10:03 AM)skidhackz Wrote: [\[CITE\]](#) And here is the final video:

Great service, I saved the thread for later order. I've watched a lot of deepfake videos on yt, they're just amazing.

Meanwhile, by looking at your sample I'm not fully satisfied as the border of the chin and other surface of the face are too blurry, it's still easy to find the fake face. I hope you can do better and more professionally. See you soon.

Deathy - October 10, 2020, 12:23 pm

I think my PC could do this, but it's my only machine, so letting it train for a few days wouldn't be ideal.

Really cool service, I wish you the best of luck with this.

skidhackz - October 10, 2020, 4:09 pm

Thanks guys.Yeah the chin edges are a bit off but this isnt a transform issue, it's due to some settings I put to save time and has less to do with training, which should have been a bit more anyway.jJust for reference, I created this in 60-70% of the usual time.The most important thing that defines aproject's success or fail is the quality of source material.

X-32 - November 20, 2020, 9:32 am

How many pictures of the person do you need?

I saw on your other thread, you said something like atleast 1000 pictures.

So does that mean I can't just grab a dozen photos from someone's instagram, and have a deepfake made with it?

It has to be alot more than that?

Grim - November 20, 2020, 2:06 pm

looks like an awesome service! havnt seen anything like this before

Drizzled - November 23, 2020, 9:20 am

Interested in this question as well... It's pretty hard to get even 100 pictures lmao!

Depends on the person.If it is a private person with a closed IG then it might be impossible unless you invite her for a board game and take some videoo :P (this is a joke, I dont condone), that way you'll get a variety of expressions too, surprise, laugh etc.For public or less public people, 10 minutes of HQ youtube video(s) is enough, assuming that you will only keep 70% of the frames (others can be blurry, out of plane etc).This, extracted at 5fps that gives 2100 frames and on those you can add 10 to 20% (max) of HQ instagram pictures.

As you've seen I've stop responding to your messages here because nobody is serious and I've already build a platform that create and sell projects non stop. I will reply to anyone that as read the introduction post and have a specific plan in mind, I'm not here for chit chat. Don't take it personally, but we have different priorities.

I invested some of the profits in a new GTX 2080 super 8gb because, except for the need to save time, which is never enough as my systems work usually 16 hours per day, I am now be able to increase encoders and decoders of the AI model which does a HUGE upgrade in face expression realism, in resolution and on the face details. It can even catch small wrinkles or moles. Smiles, whatever emotional expressions, eyes directions etc are identical to the source.

Compared the the previous sample above, some but not all differences are in resolution, which now is ~37% increased (resolution has a linear correlation with quality, after all it's an array of pixels), the encoders/decoders I kinda explained above, an implementation of the newest AI technology (new model basically) that was released a few days ago* and offers an improved accuracy over the previous, not a huge one but it's definitely noticeable. Two tests with this new model impressed me in many ways.
