Whats up HF,

I am selling my package of knowledge for stock options, Betting on Calls and Puts

Between 9:00-9:30am you will receive a detailed picture explaining what stocks for the day I am targeting

What you receive is the same stocks I will be playing throughout the day!

I will have a discord group chat created for all customers there we can talk and post profits.

The package will be \$50 a month, easily make that back in one day..

I use robinhood app and also think or swim from TD Ameritrade

Please PM or Post on thread if interested!

Might want to get a few trial members in there to give a review. There are other services on HF that have more vouches and bigger communities. Just my suggestions!

Bring me on for a week or two and I'll leave an extremely detailed review on how you are targeting your plays. What is the base for your analysis? All of the screenshots correlate to the ZM move this past week...
