Thread: [Reddit auto-poster | Multi-threaded |](#)

Tor - September 7, 2020, 10:51 am

Hey guys,

I've coded a bot that auto-posts in any subreddit of your choosing every few minutes. You can set up a min and max number of minutes and it will post randomly from min to max minutes. It's Multi-threaded and you can add as many titles, descriptions, and subreddits as you like. Also, you can use multiple accounts and proxies.

Price: unavailable.

Talked with OP in convo's about this. Seems like he knows how reddit works with these types of things.

Good luck with sales man!

Hi there, can I use this bot as a tool to schedule posts for like 1 week. Ex. I want to make 2 posts on a certain subreddit, everyday for one week?

Also can I "schedule" comments for that specific post?

Stanley - December 23, 2020, 11:46 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for

each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

It needs more coding to do that . I'll try make it better like that next year, maybe also add a gui & a mobile app to control it from distance. Thx for interest and Happy Holidays!

I probably know the most on this site about Reddit and have had dealings with their anti-evil team in the past on several occasions, If you need any advice or review for this, let me know.

Thanks for the input. I'll let everyone know when the updates are made for the Bypass System I have planned.
