[Each Plan Comes With 3 Type Of Proxies]

[+] Fresh IP with every HTTP request

With every HTTP request you will get new random IP from a proxy pool of more than 50,000 proxy IPs.

[+] 3 Minutes Proxies

These proxies change IP every 3 minutes. Use them for account creation, social sites or regular browsing.

[+] 15 Minutes Proxies

These proxies change IP every 15 minutes. Use them for tasks that require longer sessions.

[Proxies Location]

[+] All Plans Come With 4 Proxy Locations

USA proxies, EU proxies, combined USA+EU proxies and Worldwide proxies

[Frequently Asked Questions]

[+] How does Rotating Proxy Service work?

Spoiler ([Click to View](#))The entire process is very simple and easy to use. There's no need for manual IP replacements, APIs or anything technical and time consuming.

You will get one or several "proxy gateway" IPs that you need to enter inside any software that should make a proxy connection. By accessing our "proxy gateway" servers with those IPs, your software will receive a new proxy IP on each HTTP request or after 3 minutes or after 15 minutes (depending on what you choose inside our member area).

You don't need to change the IP in your software - all proxy rotation automatically happens on our side.

The maximum number of threads (connections) that you can open in your software is limited by the package that you order, e.g. an 80-thread package allows for a total number of 80 simultaneous connections (threads).

Higher packages mean the higher speed of your software - more actions done in less time.

[+] What is not allowed?

Spoiler ([Click to View](#))Any kind of illegal activity.

[+] Difference between Rotating vs Dedicated Proxies

Spoiler ([Click to View](#))The difference between these rotating proxies and our dedicated proxies is that rotating proxies are shared between all members – which is why you are getting them for such a cheap price. For some sites (e.g. sneaker or ticket sites) the success rate with rotating proxies is around 70% to 80% because IPs are shared with other users. However, with private dedicated proxies you will get almost a 100% success rate as you will get private IPs that only you use.

[+] Do you add new IPs to the network?

Spoiler ([Click to View](#))YES! All IPs in gateway proxy pool are replaced every 7 days

(Sep 15, 2020 06:05 AM)Flaxpicker Wrote: [\[CITE\]](#) Review: I was able to get a vouch copy from OP. I received a package for rotating proxies w/ 10 threads. I've tested out several websites and they seem to be quite fast - avg. speed ~250 ms. To test these further I created an ip logger and hit it with a few different requests. The IP's logged were almost all unique, which is what the plan advertises.

Overall I am happy with the product. Will be placing an order in a few days ?

I need proxies for Spotify account generation. If they worked for those I'd definitely buy. A lot of proxies have been blocked lately by Spotify.
