Thread: [How would I get a pak file open to mod the contents in it?](#)

anonymouse - September 8, 2020, 2:07 pm

Basically ive been trying to learn how to mod Resident Evil 7 on PC for a few years now, But ive never figured out how to actually extract the pak files with all the data inside them. Like levels and guns, NPCs etc Basically all the stuff that makes resident evil 7. I can see whats inside the pak files which is garbled code but I cant actually extract the files from the pak file. I gave up last year when I couldnt figure out a way to extract the contents of the pak file. Anyone know how todo this?
