Thread: [\[NOW ACCEPTING APPLICANTS\] Programmers - LOOK HERE!](#)

StickTalk - September 10, 2020, 3:23 pm

Okay guys, so here's the deal. I've been doing some researching the past week, and I've noticed that there are no working Runescape 3 bots out there. I've noticed that bigger bots (runemate, powerbot, etc) have all discontinued their Runescape 3 bot that they originally had going. So, now its literally all OSRS bots.

--

Here's what I'm wanting to do. I'm willing to offer a weekly pay to either one developer, or possibly two. I will pay two developers depending on the price that you ask for. I'm not looking for a person who completes the client, and then thats it. I'm looking to develop a LONG TERM business relationship. Meaning that you continue to update the bot client, maybe make a few scripts here and there. I can pay you a weekly rate, a salary, if that's easier to understand, BUT you will be required to show progress when asked for it. Especially on paydays. I can pay you any method you prefer - Paypal, BTC, Bank Transfer/Wire, anything.

--

If this interests you, please post here or send me a private message. Please don't add me directly to discord until we've discussed onsite first. I will only add those on discord who I will be interviewing further. Also, if you have a portfolio of anything you've already made in the past, I'd love to see it as well.

--

NOTE : After researching, apparently the programming language for an Runescape 3 bot client is a little more complex than OSRS clients. I may be wrong, but thats what I've read. Runescape 3 has updated their actual game client to what is called " Runescape NXT " which apparently uses C++ as one of the languages. If I'm wrong, please correct me.

--

Thank you for taking the time to read this, and I hope to talk with you soon!

Perileos - September 10, 2020, 3:27 pm

You're aware that the bots you mentioned got sued?

You're setting yourself up for a big debt, be careful pal.

StickTalk - September 10, 2020, 3:30 pm

I'm aware of this. And I'm also going to be taking extra precautions for these things as well.

Thanks for the warning tho ?

Runescape botting is a hot market, Jump on it.

But make sure the programmers you get are HQ af. Can see you are willing to pay good, Shouldn't be a problem

GI with the project!

Just pm me your discord and we can chat.

cookie stuffer - September 12, 2020, 12:04 pm

Part of the reason is rs3 gold is worth fuck all.

Jagex sues bot owners if your stupid enough to be based in a western country. Set up in SEA or Central Asia (countries which have rather obscure copyright laws). I think when you do the maths though it won't be financially viable.
