Automated Forex Earnings with 100K Funded Account

Introduction

Before you get read on please understand this will not be affordable to everyone and that this is a long term game, it doesn't require a lot of work and it's just about time, after you get started you won't start earning until your next month.

I've recently had \$45K of my assets liquidated due to a Binance Futures service that was more gambling than proper risk management. I'm hoping to recoup some of the lost by offering one of my streams of income as a mentorship service. Most of you I've talked to know my main source is real estate investment, there is no magical method to real estate investment other than having good credit and enough money for your down payment (1%-20%).

Back on track, Forex is a lucrative trading market, we all know most people fail trading Forex because of poor risk management or they just don't know how to trade/take bad signals etc. I've always seen the opportunity in Forex but was never able to trade on my own, I always purchased signals and they never worked out. That's when I looked into EA, an expert advisor (EA) is a piece of software that tells you when to make trades or even automatically initiates and executes trades according to preprogrammed instructions. Pretty much an EA automates your trades depending on your parameter.

How does funding work?

We will be trading with a funded account of \$100K, now they don't just hand these accounts to us for free, we have to pay a fee to get access to the account and pass their verification stage.

What is the catch to paying a smaller amount to get access to a large funded account?

1. You have to pass their verification stage, they will want you to hit an X profit target.
2. You can't lose more than X amount daily and X amount total.

After you pass these two main objectives you will be funded with a \$100K account, now \$100K isn't the only option they offer, there is a 10K, 25K, 50K, etc but to maximize profits we want the \$100K account (best part is we can have multiple).

How do we earn after we receive our \$100K funded account?

We will be using an EA to trade our \$100K funded account, so we don't have to do anything after we receive our funded account and run our EA, everything will be automated. Except for cashout, you will need to cashout via check/bank account from the broker.

This EA was not made by me but they are known and have been around for a while, they've have backtested their results 5 years and have been profitable.

This EA isn't like many where they open a large position and get lucky, their EA is about consistency in long term profitability not short term. Their mission for your account is to grow it exponentially like a savings account. You are looking at a 5% monthly average gain, there are some

months where they will earn more/less than 5%, but 5% seems to be the most consistent. Most users use this EA for their personal accounts with their own money trying to grow their \$1,000, \$10,000 account but we will be capitalizing on the funded account option to withdraw our profits monthly.

When we use our funded accounts, we only receive 70% of our profits since 30% will go to the broker. You can definitely use this EA for our personal account too but let me break down some math.

- 1 \$100,000 @ 5% profit is \$5,000 70% = \$3,500 profit.
- 3 \$100,000 @ 5% profit is \$15,000 70% = \$10,500 profit.
- 10 \$100,000 @ 5% profit is \$50,000 70% = \$35,000 profit.

I personally use 3 accounts.

What is the cost to get started?

This will not be affordable for everyone, this is a long term legal stream of income that you can use until Forex is not accessible to you.

Cost of Mentorship will be \$1500 + \$200 Monthly Management

This cost will include full mentorship from A to Z to get started and I will get your account approved for funding to get started.

Support will be provided via Telegram.

What do you mean you will get my account approved for funding?

You don't have to go through all the pain of passing your verification process and I will pass it for you, guaranteeing you get a 100K funded account on the first go.

Additional Startup Cost

\$150 Monthly for EA

\$15-30 Monthly for Forex VPS

\$600 Funded account fee (Gets refunded after you get approved for funding)

*If you want an additional 100K funded account after your first one I charge \$1000 for any additional funded accounts you want)

Extras

*This does work WORLDWIDE.

*You do have to be 18 or older.

*There are no refunds.

*Full disclosure; I am not means by a professional trader, I am trusting and using a automated system to make my trades.

I will personally pass for you on your first account. I know 10% is hard for most or even EA's.

If I don't pass then you will be reimbursed \$600. I offer this service on a Facebook group.

If u ever come back , hit me up , got alot of question and one of those is : this works in Europe?

And what is the best amount to invest?

Hope you will be back and we gonna work

Nohandlebar - September 11, 2020, 6:20 pm

anyone has his contact info

i do think you talk about the ftmo challange right?

i know a few people who passed it and say its good i was going to do it but i got into ewhoring after and i never even started i just got details to the mt4 account and all but i just never did it. i do can say i am kinda profitable.

i am tracking every trade i take on demo and it looking good but i still think i am too young for this forex game and i just use demo for now. untill i have money i don't care about loosing.

Satla, he is banned now. So, no use talking about it. And yes, he probably meant that if not other prop firms.
