Hello and thanks for your question and support. Check my other threads as I sell an smtp email and sms bomber/sender. But yes with this you can send the smtp with other smtp email sender software and it exports two ways which should work fine for those.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page

and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
