Does it support proxies if not , will be blocked very quickly by big domaines ; also is it possible to use the search option to filter emails that have the specific query ? for example i want to output and email list of facebook users only

Cheers

CheersYes you can export with the name of what your looking for. It doesn't support proxies as of now could be added next update though, never been blocked before.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for

each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I buy the tool from him not work i ask him update 21/06/2021 no news he just say "i will do it" "you need to spam me for i see your message" but i litterally spam him he say "My man I'm at work your blowing my phone up" — 30/07/2021 and he say me he will give me lifetime in all program for time he take for update i get nothing and update are not here and no reply after maybe this message will make you reply and move Epic

Edit 31/08/2021

No reply from Epic so for me this program is like a scam (he take my 10 euro see its not work and never reply after) don't buy it
