Thread: [Passive Income from Holding Cryptocurrencies](#)

David. - September 13, 2020, 6:18 am

Hello, I want to show you a great website called [Celsius.network](#) which allows you to earn passive income from your crypto wealth.

DESCRIPTION

[Celsius Network](#) is a crypto app which pays its users weekly interest on their coins. You'll get +11% interest on stablecoins and variable interest on other cryptocurrencies, there's no minimum deposit amount, you can withdraw anytime, and Celsius doesn't charge any fees. Read more [there](#).

SUMMER PROMOTION

Currently, they have a promotion that's offering \$20 when you sign up with a referral link and deposit +\$200, and an extra \$20 if you enter a promo code and deposit another +\$200 (or \$40 for a +\$400 deposit).

Steps to claim bonus

Download their app on [Android](#) or [iOS](#) (Sadly you cannot access their platform via web)

Create an account with my [referral link](#), or use code 1511971988 during registration (NO REF, NO \$20 BONUS)

Verify your email and identity

Enter code "SUMMER" in the Profile section (top right) - enter a promo code - have a promo code?
- If it says "Congrats!" then you've successfully applied your code.

To get the \$40 bonus, deposit \$400 in any supported cryptocurrency (If you only want \$20, deposit \$200). Note: the deposit must be in one transaction and only after you've applied your code (step 4). I also usually deposit a couple \$ more, just to make sure the value of the coins is over the threshold or just deposit stablecoin to be sure that the price of your deposit doesn't change.

After 30 days, your bonuses will be unlocked and become available for withdrawal. Important: don't withdraw anything from the app until the bonuses are applied, or they may be cancelled.

IS THAT SAFE?

You may think that's some kind of scam, but they are pretty known in the crypto community and also their website is incredibly transparent.

Their socials: [Twitter](#), [Reddit](#)
