Thread: [\[XSS\] script for cookie grab](#)

**Tessaiga88** - September 14, 2020, 5:09 am

I was following this tutorial : <https://hackforums.net/showthread.php?tid=2640987>

but have checked also other and i have question about the script.

I have hosted my grab.php in SPAM webiste and inject the code with redirect in one blog page like this :

Code <https://pastebin.pl/view/e453c35a>

Im having some trouble with browser. Sometimes the script works, sometimes not. With Google Chrome the scrip works well, with Edge or Firefox, no.

Someone can help me and give me some advise?
