More than likely a dead service, Dont buy I bought a server 1 week ago and the owner ignored me on telegram and on tickets, vps is still pending!

benshiivibes - September 4, 2021, 9:51 am

They are scammers!

I bought a spoof vps and it was pending for a week they ignored all my tickets and removed my account.

DO NOT BUY

Of course they are scammers, and when it "works" they was reselling from bad hosting providers that also ban.

Go on <https://hostinblack.com/> for spoof servers, we also give free test.

Alex

Hello,

Please share screenshot or something or i can assume that you're just another competitor that want to give shit to our services.

No one contacted us for undelivered VPS. We have one in pending but we will setup it just now because we changed network configuration on Node03 and automatic installation is not working at the moment because the free node is offline (just need an hour for getting everything fixed).

And please, when someone order for 1 month, just give him a full month ;)

This is hilarious.

Regards,

Alex
