Who's ready for this to come out it's going to be in beta this week for india and slowly into more and more countries. I'm curious if they're going to have similar discoverability as TikTok and if those views will count for monetization. What are your thoughts on this?

Oh it sounds that Youtube would be taking over the fun from those Tik Tokers lol

I am not aware of this and only now I get to hear it brother but I guess if the viewers will be from legit viewers it will be count for monetization.

I don't think it would take over unless they tweak their algo and update the video length

If they allow creators to monetize the content then I think a lot of them will jump into YouTube. We'll see.

Haven't read anything about this will surely check this out and see whether it is going to fill the void of Tiktok or an advanced version for monetisation.

They all are I've been getting constant emails to join new apps lmao but all of them have failed only one that's semi decent is Instagram reels but definitely not worth leaving tiktok he's a nice extra feature tho

Tiktok already pays for views but I there's no way youtube will pay the same cpm if it'll have similar discoverability as tiktok I'm definitely curious how it'll go for sure and slowly been transferring followers anyways

Eh Miggt be hard to do with youtube, I think instagram reels is the best closest thing, but interested to see what YouTube does.

There was a company named Zynn that started up a little before the TikTok/US drama started. They paid people Paypal to refer new members, I made like \$50 off of it.

is this why MrBeast made a channel for this exact reason?

I think it could be beneficial. Short formed content is always fun to scroll through.
