Thread: [\[Cheap\] Web based account generator website + setup](#)

GerwinT - September 15, 2020, 4:20 am

Do you want to start your own account generator, but you don't know how to code. Then this is perfect for you.

Important!!!

You must already have a web host (including a mysql database) before buying this service and be willing to share the credentials with me. If you don't have a webhost you can go to SPAM to get hosting for free.

You must also have a Paypal where you can receive payments.

Pricing

\$10 (Paypal only)

This includes setting up the website and lifetime support.

FeaturesDifferent plans

Different generators

Support page

User statistics

News section

And more

I will maybe do different sources in the future.

TOSNo refunds.

You are not permitted to sell the website to someone else without informing me.

I am not responsible for what you do with the website after i have set it up.

I must have admin access to the website and web host at all times. (This will make it easier for me to fix bugs and to support you when you have problems)

Screenshots

Dm me on Discord for screenshots (GerwinT#8570)

You can make it generate many types of accounts. As long as you are restocking the generators with accounts, because I think you misunderstand the product, because you are not the one generating the accounts. You are the one that is stocking the generator with accounts so that others (that pay money) can generate accounts. I will make a site for you where you can sell access to the generator, but you have to put in the accounts yourself.

Onireves - September 17, 2020, 3:43 am

Can you send me an example of the website?
