Thread: [\[Global Elite\] \[Prime\] \[PUBG\] \[FM 2020\] Steam Account for sale](#)

Xamarin - September 17, 2020, 3:19 am

Hello!

I am selling one of my own Steam accounts. The account was created by me and it comes along with the original e-mail (which i also registered).

This account was used mainly by me to play with my low-rank friends, but during the quarantine I had several hours free ... so I decided to grind and get to global on both MM and wingman. Please note that Facelt has not been registered in this account, so you can do it by yourself with your own username.

Here is a list of the good games this account has:

Spoiler [\(Click to View\)](#)

Counter-Strike Global Offensive

PLAYERUNKNOWN'S BATTLEGROUNDS

Hell Let Loose

Football Manager 2020

Resident Evil 2

[HERE](#) you can find screenshots of the account.

Since the name and the icon of the account have been changed (for security-exposure reasons), you can send me a message or a convo here on-site in order to give you the Steam url.

The deal WILL go through a middleman. You can choose which one you'll like, otherwise I'll make the selection on my own; whatever you prefer.

BIN Price: 65€

Please feel free to offer any other amount that you think reasonable either by replying below, or by sending me a message/convo.

Dropping BIN price to 43€. That's a really good offer considering we talk about a global account with several good games in it!
