Thread: [Shopify guru's on Fiver](#)

Mr. Corleone - September 18, 2020, 3:40 am

So, I've seen a few people claiming they can make you six figures by making your shopify shop, 25 products, themes, shopify plugins, and also advertise for you. And all that for under \$100.

Anyone know if this is real and how it works?
Have you or anyone you know done this?

I am interested in it. But it seems too good to be true.

Yungversace - September 18, 2020, 8:04 am

There are many but depends on about whom are you speaking of?

majority are shitty

Wayne - September 18, 2020, 8:10 am

If they could do it, why wouldn't they focus on their own stores?

Exactly, but they got so many good reviews. Could be fake, who knows.

I'd believe that.

CinderGhoul - September 18, 2020, 9:08 am

I am not sure about shopify but consistent six figures aren't generated over night, it takes lot of hard work, time and marketing costs.

I am not experienced in shopify but from my personal experience of being in a SAAS based company, we use facebook marketing as main tool to market our SAAS product same as what most of the shopify stores use. We have made some really good profits in the last one year but we put a lot of effort into marketing and development. That is how a startup product grew.

People saying they can make you six figures for just xx\$ is kinda bs imo. That doesn't even include facebook marketing or influencer marketing costs.

Just my 2 cents. I'm not a shopify expert.

mindshift5 - September 26, 2020, 11:40 pm

And it isn't true mate

Unless you're a god there's no way I can see anyone using \$100 to set all that up and make 6 figures

All shopify stores come down to the same thing, how good your ads are, how good your winning product(s) are, and how good your targeting is.

I've ran perfect stores that did 50k a month, and I've ran stores that did 1k a month, just depends on those factors!
