Thread: [Easiest 300 Points method towards Crypto](#)

de_g3ntl3m4n - September 20, 2020, 10:11 pm

Alright my dudes so listen up and act fast. TronLink wallet is giving away 300 points to anyone who has downloaded there TronLink Wallet and uses the code: 7Nkb

How Would you claim these rewards simple and easy?

1. Download the Tron wallet on android or apple
2. Create your wallet or login into your wallet
3. on the bottom right click on me and go to invite friends
4. On the top right click on claim rewards and enter the code

7Nkb

You will receive 300 points towards any of the following crypto TRX,ETH,BTC,or BTT.

There has been belief that it may be about 3000 TRX worth of points or about the same amount as the uniswap token that had been recently launch to be honest I would recommend to get it with the code 7Nkb

If you do not receive your rewards be sure that you wallet has been activated. To active your wallet you will need to hold at least .01 or .1 trx in you wallet... Easy Right...

What are you waiting for go?

Then go ahead and share your own code,

This doesnt work if you create multiple wallets on one account though like uniswap

Whats will be your strategy haha

if you are don't see it, gotta make sure you activated your tronwallet with some tron. you need to have at least .01 tron inside your wallet. Try doing that. Let me know if that helps?
