Thread: [\[30\\$\] GET MONEY AND FREE STUFF | GREYHAT | NICK'S PACKAGE](#)

FcknWeeb - September 21, 2020, 6:47 am

(YES. THIS IMAGE IS FROM THE OTHER METHOD BECAUSE THIS PACK CONTAINS THE OTHER METHOD TOO).

This time I put everything in to create this little pack of ebooks and resources.

A little info about these methods:

1. THEY WON'T WORK 100% OF THE TIMES. NOT ONLY IT REQUIRES SKILL, BUT IT REQUIRES LUCK TOO (no, it's not blackjack. chill out.);
2. These methods are grey hats.

Requirements:

- A pc. I mean, it's pretty obvious at this point.
- PayPal account (depends on the method)
- You <3<3<3<3<3

I'm not very good at contracts around here, so please be sure to PM me or comment down below if the contract doesn't work and I'll be sure to come to you!

THE PRICE IS 30\$. THIS PACK CONTAINS:

- 5 eBooks on how to make money/get free products over the web;
 - Discord Status Changer;
 - 2 Lists of high quality and fast proxies;
 - 6 lists of the most common passwords (two of those lists are the most common password used for Adobe and YouPorn accounts);
 - US Data Lists, such as a list of every US College, every US Private School, every US Public School;
 - List of common street names;
 - List of every zip codes available;
 - List of dates, domains, and US Cities.
- AND BONUS TOOLS!

ALL OF THIS FOR 30\$? YES.

I ONLY ACCEPT PAYPAL OR BTC.

If I don't answer it will take around 24h MAX for me to answer you. Sorry about that.

ToS:

1. Please don't share these methods. I mean, I really cannot control you anyway, you could do whatever you want. Also, if you did and you told me, I really couldn't do anything about it. Consider this as something "ethical" or whatever.
2. Leave a review after the methods!
3. I'm sorry, I will not give out refunds.

[contract=uid]Start Contract[/contract]

Some payment proofs? Maybe give out some vouches. I know 30\$ is not a lot, but still.

Yes you are right, I forgot about it.

Added!

If you need someone to write up a review hit me up.

GLWS either way.

Edit: OP Has given me a copy to review.

Methods: Some of the methods that are being sold are public methods. However, the way that they are described in the pdf's makes them easier to understand. However, the pack does have some private methods as well that could possibly work if you put time into them.

Software: The pack is full of different types of software, I use a Mac so I couldn't use any of them but there is a decent bit of them.

Organization: The organization of the entire pack is decent. Could be better tho.

Price: This is something that you would expect to pay around \$50-70 for. So the price is good.
