Thread: [How to get "\[BRAND NAME REMOVED\] U" via changing location \(insane traffic + avoid ban if achieved\)](#)

Truth - September 21, 2020, 7:22 pm

Anyone know how to change location on [BRAND NAME REMOVED] app?

can offer all my bytes + maybe a secret method to avoid banned + get insane traffic with it

You must change location to college campus and then you get the popup
[https://blog.gotinder.com/introducing-\[BRAND NAME REMOVED\]-u/](https://blog.gotinder.com/introducing-[BRAND NAME REMOVED]-u/)

Its not as simple as getting [BRAND NAME REMOVED] plus as [BRAND NAME REMOVED] knows your real location. Its not as simple as gps spoof as [BRAND NAME REMOVED] uses wifi also. You can try both tho maybe you're better at it

If anyone can do it and get the [BRAND NAME REMOVED] u pop up. Send me the screenshot and lets make bank. Easy \$1k/days

Or if you just want to sell it, lmk price, but of course must prove it before even discussing it with me

And if anyone is in a big ewhore discords or telegram please PM me an invite
Just use any kind of emulator , bluestacks , nox ,
Or buy [BRAND NAME REMOVED] gold and then refund!and change the location

[BRAND NAME REMOVED] uses wifi + gps for location. Would emulator really work?

Also [BRAND NAME REMOVED] gold/plus location wont work as it still knows your real location

If you're talking about on ios, your device needs too be jailbroken or it wont work, if your device is jailbroken you can download a tweak called "GPS Faker" on the bigboss repo and then set it too the country you would like and it should work, and then if you're on android you can download an app called "Fake GPS" off the playstore and spoof your phones gps location. Now when it comes too the ip your best bet would be too use some form of rotating usa 4G proxy (but im not sure whether that will work on phone devices) and then you have too also use a phone number from that location because if you don't you'll get shadow banned quickly.

As far as I'm aware, you can use the Passport option (from [BRAND NAME REMOVED]), or spoof your location using a GPS app

Mark Ronson - September 22, 2020, 5:05 am

It's hard to spoof your location on phone now, much easier on browser

LosingMyMind - September 22, 2020, 6:37 am

3utools for ios need To connect your cable to pc

Location Spoofer on google play for Android !

Pimping - September 22, 2020, 8:03 am

I would say buy [BRAND NAME REMOVED] plus if you want to spoof on the app version as its easier and its built in on [BRAND NAME REMOVED] where you can change location

Truth - September 22, 2020, 2:40 pm

Updated OP with an objective way to see if your method work. If you really think you can change location then prove it and get the [BRAND NAME REMOVED] u pop up

Maybe that would work, worth trying it I guess

Driz - September 22, 2020, 9:35 pm

My method seems to be working, drop me a convo

So far no one has been able to achieve this

zombitech - September 26, 2020, 8:17 am

But how would u get a .EDU mail ,we need a edu email to signup for it,I know a method to fake the location perfectly tho

Truth - September 28, 2020, 5:31 pm

Also if you find a way to spoof location(and actually prove it by getting [BRAND NAME REMOVED] u pop up) I can just pay you PP or BTC instead. Send convo

redjje - September 29, 2020, 9:44 pm

I can help you. msg me on discord redjje#2590

can you get this at will or at random?

julsngbatac - December 5, 2020, 9:33 am

hmu with ican help you out step by step

HTML_Psycho - December 5, 2020, 10:02 pm

Please send me a conve if you find a way to spoof location on PC <3
