Spoiler ([Click to View](#))

(Sep 23, 2020 02:05 AM)DoubleClutch Wrote: [\[CITE\]](#) I've been granted a vouch copy of this project's predecessor, Excelerate. I've had some time to play with it, and I really appreciate the simplicity involved when using this product. No clutter, no mess, no need for tons of dependencies or even anything to complain about. I will say that it does bypass gmail, and it made it through my AV as well. Upon execution of the macro file there was almost nothing noticeable to show something was off. I have no criticisms, honestly, this man knows his stuff, and is professional to a fault to boot. Only suggestion I can think of would be maybe find a way to optionally throw an error upon execution, but honestly that's possible many other ways it doesn't need to be done at that level. I have not tested the new word functionality, or this newer version, but I'm confident that this addition to its capabilities will just make it more valuable of an asset. Remember, this exploit is super useful for pentesting commercial servers and businesses, given proper SE, and there are places where people still charge quite a bit more for programs that work half as well, honestly he could charge more, get it before he comes to his senses. A+ man, good work, and thank you for letting me play around with it, it was fun.

(Oct 6, 2020 12:15 PM)sadjahskahda Wrote: [\[CITE\]](#) Vouch , good product.

(Nov 3, 2020 08:40 AM)zxc4we004 Wrote: [\[CITE\]](#) It's fud, update everytime, that good service, support very handsome and always have good answer for me ^^

(Nov 5, 2020 08:50 AM)mdfilms Wrote: [\[CITE\]](#) Vouch, seller has been very helpful over chat. Quick activation and responses. Program works perfectly.

Terms:

Spoiler ([Click to View](#))

Sales trashing/posting on sales thread for support will result in loss of ability to get future updates. Any questions about the software should be sent in a private message or telegram.

Any attempts to reverse engineer, crack, or otherwise tamper with software will result in immediate suspension of support and any future update.

Refunds will only be given upon failure of software to work as intended after one-on-one support with PsiSolutions has failed to provide a solution.

Scanning of any generated files on sites that distribute malware for analysis will result in automatic termination of all future support and updates.

PsiSolutions reserves the right to terminate support of programs and future updates for any violations of these terms or as deemed necessary.

I am not responsible for intentional misuse of this program. This program is provided as-is as a means of pentesting. No blackhat activity is encouraged for users of this program.
