Thread: [Small Suggestion : Ability to edit past pop?](#)

Helper - September 24, 2020, 10:44 am

Hello.

I had a falling out with a member. Among many things, he said I spent too much time on Convo/HF than with him on Discord. (I do)

He neg'd then ignored/blocked. I'd like to be able to change mine, or delete my positive, but I cannot. Seems odd.

Strange how a friend of years gets jealous of a place he introduced me to.

You're able to edit your rating on him to a Neutral rating as a L33t member.

It should show the option after clicking "Rate User" - just change the positive to the neutral and click Update Rating.

Deleting given popularity ratings is also already a feature, it's just for the V3ndor usergroup only.

Side note: I would advise against including your personal issues in Suggestion threads.

Perhaps we misunderstood each other?

Unless you're saying I can edit it from my Control Panel, I don't see a solution in your post.

As to your side note, my advice is posting in other suggestion threads if you dislike this one.

[Cooligan](#) did provide a solution. Like... he literally provided the exact, specific solution to your problem. You simply click the "rate" button again (just like you did when you gave them the initial popularity) and then you choose a different one than what you already have. Then you click the "Update Rating" button.

Try it from [Verdande](#) popularity page: <https://hackforums.net/reputation.php?uid=4765118>

How? Where would I click the "rate" button on a member that you cannot view the profile of

Am I missing something? Did you both see the suggestion I made? Are you saying I can do it from my profile?

When a user adds you to their Ignore List you're still able to access their Popularity page, it literally says:

"You cannot view their profile. You can view their popularity HERE. This is an upgraded member feature."

Not everybody is as accomplished at reading as you are, Cooligan. ?

You can't Pyro; when a user Ignores you you can't see their profile.

Thank you for the edited in reputation link Xero, that worked.

Again, sorry for missing that rep link the first time. It's fixed now. Closing thread.
