(CNN)A sign memorializing the hundreds of thousands of people who have died in the United States from Covid-19 has become a target for vandalism in a suburban Chicago town.

The "Covid death scoreboard," as its been dubbed, has been vandalized five times since it was installed Friday in Northbrook, Illinois, organizers said.

"We've had vandalism before when we've put up displays, but I was shocked because we're all in this virus situation together," Lee Goodman told CNN. "Frankly when we put it up, I didn't think anyone would pay any attention at all."

The sign was made to evoke emotion that the United States is leading the world in Covid-19 deaths, but it stirred a different kind of outrage.

This is sow intence to know righth sow sad and depresing the people from this happining i want cure this virus to make people free...

The sign evokes outrage because it is bullshit based on top of more bullshit, in an attempt to force things like economic and social lockdowns in an attempt to fuck with the economy to interfere with the election, not only through the use of mail-in ballots which the counts can easily be swayed and manipulated, as well as to attempt to manipulate people into trying some more 'UBI' of some sort, making the people more dependent upon the government, and thus granting the governments more power over the people.

It also helps with the 'Big Reset' strategy pushed by some of the richest and most powerful Elite in the world, as defined:

That's a rabbit hole worth going down, but this is not the place for it.

Facts:

<https://canadafreepress.com/article/the-cdc-confesses-to-lying-about-covid-19-death-numbers>

The truth is that there are LESS than 200K deaths involving nCOV-19, and the overwhelming number of those have at least one comorbidity, if not multiple. Furthermore, the fact that hospitals and clinics are being financially incentivized to find covid cases, as well as getting paid extra for any covid listing on the death certificate makes it extremely probable that hospitals are using quick, cheap, unreliable tests that lack the ability to properly distinguish between nCov-19 and other, more common corona viruses in an effort to collect some quick, fast cash. When you actually do the math using the CDC's own numbers to actually look at the number of people that died from covid alone, that 200K shrinks to less than 10K super quick. And when you look at the ages of them, overwhelmingly above 70... then it quickly becomes apparent that the covid bug is actually less deadly than the common cold/corona viruses.

And when you look at all the other potential motivations for certain people or groups to inflict such mass terror upon the common people of the globe, as well as how often something exactly like this has been 'predicted', then it also becomes apparent that either we're also experiencing a massive development in human precognitive abilities, or that something like this has been planned in the works for a while, now. Factor in how many plans to prepare for something like this have been laid by governments such as the USA and the UN and of the other global players on the field, and it seems far more likely that you're playing in to the wishes of those that wish to enslave you.

Im not sure if all the Covid related deaths are actually covid related. A lot of the deaths ive heard about, personally (Im from Australia) Have been the elderly. Now i dont want to sound morbid or bitter or anything like that but most of them are above 80 going into 90. They really dont have long left and they are quite fragile. This virus doesnt need to be super serious to impact them. I do feel like in the US the numbers are being put up and not really counted right. I dont have any facts or evidence this is just my opinion.

This isn't the first time deaths have been exaggerated and rounded up in order to push a political agenda.

I don't think it's exaggeration to die so many people. It's a fact that a lot of people died, and many people die every day. We can't ignore this fact just because some politician lead this thing to politics.
