Thread: [Tomek Radomski UID=4198136 Multi-Accounter & Scammer](#)

Deathy - September 26, 2020, 10:46 am

User: [Tomek Radomski](#)

I wish I had decided to do this research before I spent \$400 on this user's martingale gambling script: [\\$3000-5000 PER MONTH - TAKE ADVANTAGE OF CASINO BONUSES \[AUTOPILOT\]](#), I had no idea it was a martingale script when I bought it, but I will leave the discussion of that in my deal dispute. [Deathy has Disputed a Contract with Tomek Radomski \(4198136 \)](#)

Let's start by taking a look over Tomek Radomski's account.

In his first month of joining HF, he began selling a method ([\\$100+/DAY MONEY MAKING METHOD - SAFE AND EASY EARNINGS](#)) which fits the same description as the method he's currently selling, only the price is a lot more this time.

The only vouch on his thread is from [TheFragger](#), a closed account with 23 posts - upon checking their trust scan, would appear to be a multi.

He closed the thread, most likely deeming it a complete failure, as one of the replies basically exposes how shit it is:

Spoiler ([Click to View](#))

Looking through his posts at around this time, it would appear he purchased and vouched for this ([EACH COPY HAS BEEN SOLD](#)), shortly after it was posted:

Spoiler ([Click to View](#))

Have a quick read through of that thread, and you'll see it's clearly a scam, the seller has multiple disputes open, people also complained about it being a gambling method, something which Tomek/BitcoinMania likes to sell, so I wouldn't be surprised if that's also him.

I'd imagine he would have struggled to sell anything after being exposed - Tomek then has a hiatus from HF for around 9 months:

Spoiler ([Click to View](#))

He returns to the forum in January of 2020, with an AGC giveaway ([\\$25 AGC GIVEAWAY \[EVERYONE\]](#)), to boost his popularity, in prep for another method sale, only this time he is immediately caught out, notice the first reply on the thread:

Spoiler ([Click to View](#))

Another user responds advising that at the time of posting, he had another user matching his IP:

Spoiler ([Click to View](#))

Given this failure to boost his popularity, Tomek takes another hiatus from HF, this time for 8 months.

As you can see, he was last 'active' at the beginning of 2020:

Spoiler ([Click to View](#))

He then comes back this month (September 2019) and changes his username from BitcoinMania, reducing the risk of people recognizing him this time:

Spoiler ([Click to View](#))

He creates a couple of 'filler posts' in The Lounge to get back into the swing of things.

This is followed by a \$30 BTC giveaway, which equates to a number of users giving him popularity which of course makes him seem more trustworthy: [\[\\$30 BTC Giveaway -3 Winners \[Ends 25 September\]](#)

Some popularity, three posts (including the giveaway thread) later, he's ready to sell his extremely overpriced martingale script: [\\$3000-5000 PER MONTH - TAKE ADVANTAGE OF CASINO BONUSES \[AUTOPILOT\]](#)

Let's go over some of the 'buyers'.

[The Degenerate](#) appears to be the first. An account that is 7 days old, his 41st post is on Tomek's thread, confirming his interest, he 'purchases' the method for \$250.

[junnar1968](#) looks like the second customer. An account with 52 posts. Although the account is two years old, he had a HUGE two-year hiatus from the site, judging from his posts:

[ethelooking](#) Unsure when this user purchased, but an account that is 9 days and has just 1 contract completed.. with Tomek.

All three of these users left positive reviews of this method:

Spoiler ([Click to View](#))

With some 'sales' and vouches, Tomek can now inflate his already overpriced method to \$400, which is what I ended up purchasing it for, in total I lost over \$550 from this.

Looks like my DD and CA struck a nerve:

Good job on the research buddy. I've purchased his 'method', but I'm using a middleman for the deal so I guess I'm safe.

So far I've actually made money with the method, but as you mentioned it's literally a martin gale system and Tomek told me it would take me about a week to get the bonuses and start to make good profits. I'm wondering now if my money will even last one week or if everyone using it will get hit by a bust soon.

What do you think?

Appreciate that man.

I'm so frustrated, I didn't think he'd accept the use of a MM. \$550 gone in the space of a day.

Who knows, martingale only works if you have unlimited bankroll.. the crash will happen at some point.

Tomek Radomski - September 26, 2020, 1:20 pm

All the information is fake. You canceled the autoplay and you missed catching the desired target and now you want me to refund you.

These fake claims are quite offending. Literally everyone using my method is making money, so I don't see a reason for them

Also you can't use these sites many times cause of region, it's not allowed in US and other countries.

2)That method has to do with the platinum accounts and the "giveaways" that site gives to those who wager good amounts.

3)Even if you gamble 0.000001 btc per round at 1.01x (98% winrate) you'll lose many \$\$\$ while you're trying to get the top wagers on the site.

4)Top wagers for the "giveaways" are couple btc so probably you won't be able to make the number which is required to get the bounty. And if you do you'll lose around 200-500\$ dollars probably while you're trying.

5)If this method worked as you say you would just make tons of accounts on these gambling sites and you would be millionaire.

6)Plus selling 3 copies within few hours from the time that you posted the thread to guys who joined literally 2-3 days ago (Join Date: 09-19-2020) and all newbies with no contracts seems sketchy.

I literally exposed him before you buy buddy and happened exactly what I said. I doubt he'll refund you. Sorry for your loss but it is what it is.

There are few other guys who lost money as I know, let's wait for their reply too.

Why are you lying?

Check the images on my deal dispute.

You said this last night:

I showed you proof this morning, to which you confirmed, that your script had crashed, but instead of offering me a refund like promised, you said this:

Although you've literally lied, I still agreed to your proposal - as you'd said it take a few hours at most.

Your money won't last more than 48 hours if that's the case.

Sakhill - September 26, 2020, 1:59 pm

It's easy to prove that you lie or not, just go into "Transactions" under your profile, and go on "Bets" put screenshots of your last bets.

As I said in Tomek's thread I knew that this will happen, but he didn't listen my suggestions how to improve method.

Sorry for your loss, as he state in his thread he should refund you if you put all proofs that you fail. I didn't have problems, I was use middleman, put terms where I was protected, make deal with him, I was fail and send him proofs, and middleman was return me money.

About his account and first vouches I was investigate that as well, and discuss with middleman, and this is why I was go with middleman as I know that I can just lose my initial investment.

But yeah anyway, I was implement my methods into few accounts on stake, and it's work well, and if is true what community write about bonuses that should be good, but we will see.

What is your logic behind this? Just give OP what you promised or refund him (you said you would refund if he lost the \$100 anyways, which he did), then he will close the deal dispute and the CA. You are basically using this as an excuse to scam him.

Sakhill - September 26, 2020, 2:06 pm

There is no doubt, I send same proofs and that's enough.
He should refund you in fully.

Tomek Radomski - September 26, 2020, 2:07 pm

Here I have the full proof OP is lieing

First he says to me his last bets were 18-19\$ which is false by his photos as we can all see it. Exactly few seconds after he stopped playing the desired target came

Here is the proof

I don't owe him a refund, I only offered it to him as I didn't wanted him to saletrash my thread. He broke the rules of our deal and I have it all recorded

@Sakhil as you know how the method works, you can see it is clearly his fault for stopping at the right moment

Sakhill - September 26, 2020, 2:14 pm

Well in that case I have to be honest, I'm neutral here, but yeah stake had problems in last 2 days, and autobet was stop from time to time (happen to me few times during the day), and the thing is if your last bet was 10\$ and autobet was stop by mistake, and then you start again autobet, you will continue from 10\$ and then you will get busted, as you have to manually set base bet.

So if you lost money in that way I don't see reason to refund you as you break rules which he gave you on the beginning.

EDIT:

To clear all these shit, can you just please post all your bets from beginning till end, or just give me access to your account, I'll check and see how you lost money.

That will clear everything.

Doesn't make any sense, you admitted in the other thread you were going to refund him \$200 from what he lost but he had to "wait on you".

Regardless if he's betting \$8 or \$18 he still lost his bankroll. What difference would the bet amount made? It still bust his initial bank roll. He should of won at \$8 bets if it didn't bust.

He then said this:

So, as agreed, I ran it overnight:

The last bet is 0.00082907, his script multiplies my bet roughly 20x on a loss.

Look at my balance, it's just over 0.00082907, the script then stopped as it no longer had enough to cover the bet.

It's pretty simple.

Again, you make no sense. Even if he had \$29 left, you suggested him to bet \$18, you complained he was betting \$8, so now you're saying he should continued his \$8 bet to play out 3 more hands in order to win or play out his remaining \$29? How would the \$18 bet covered 3 hands or even "within the 2nd" to make? 18×2 doesn't add up to \$29 last time I did math.

So technically, your method is a bust, regardless.

(Sep 26, 2020 02:28 PM)Sakhill Wrote: [\[CITE\]](#) @deathy it's actually matter, if script was stop you should start from base bet, but if he didn't tell you that I still think that he own you refund.

It's matter if you start from 0.1, 8 or 18, because with that low bankroll and if you start with 10\$ you will bust very fast.

But as I said, if he didn't told you, that if autobet stop, that you should start from base bet he own you refund, if he told you I don't see reason for refund.

Bro the thing is that his autobet stopped and he missed catching the target which came 2 games

after his last bet. If his autobet didn't stop he would catch it and not complain now. But again that's his own fault

Deathy - September 26, 2020, 2:31 pm

(Sep 26, 2020 02:29 PM) Tomek Radomski Wrote: [\[CITE\]](#) Bro what are you talking about?

I don't suggest him to bet \$18. This is a lie created by himself.

His next bet would have been 8.80 \$, the next 9.50 and the next around \$10

And he would have never lost, his RDP crashed probably and this is why his betting stopped and he was left with \$29

Therefore that's his own fault and I will not compensate him about it (even though I would)

YOU THEN ASKED ME TO TRY IT ONE MORE TIME:

To which I did, and this was your response TODAY, AFTER I PROVED IT RAN OUT OF BANKROLL:

You won't refund, and you won't run your own script yourself, to send me \$200, like you suggested.

It's fucking matter as I have same method in my hands and when I was make contract he told me that if autobet stop I should start from base bet.

It's look that I defend Tomek but I don't, I just try to see what is going on here and how you lost money, I was lost 100\$ as well but I didn't have issues with autobet system there.

But yeah anyway now I was realize that your autobet was stop when you was bet high amounts, that's fucking unlucky.

You didn't lost with my method because of me, you lost because you stopped your bets and you were left with \$29 which you could use to recover what you lost and make profits

You lost via my bonus offer that has nothing to do with my T.O.S as you broke them already once.

It's about stake, stake was fail, had same problems in last 2 days and today is working fine.
But anyway I'm running script on bustabit for last few months 24/7 never had problems like that, so fuck it.

Hopefully you will resolved that, I suggest you Tomek that you give him account with 100\$ and run it as suppose to be, if he fail (again) refund him rest of money and everyone will be happy.

I don't think he deserves that to be honest

I was ready to refund him \$200 but with the fake CA he did, I will be forced to close all my relationships with that client

Sakhill - September 26, 2020, 3:45 pm

Well if he was bust twice I think so that you have to give him a chance.

Anyway he feel that he is scammed so that's his right, I think so that if you give him a chance he will close that, and as you state in thread you will refund people who doesn't make money, I don't think so (from that what i saw) that he was bust twice because of his mistake, so don't use that for excuse to break your ToS.

But it's up to you guys, I was just try to find the best way for both of you.

Process or not, your TOS states if they don't make money you refund the full price. If you didn't want this to happen you could've added more but that's all there is in your TOS. Therefore he broke no rules since the rules in your thread were not stated directly, meaning he should be eligible for a full refund.
