I saw Mr Blades: {SEO}Guaranteed First Page Google ranking Services (Very Cheap Price)

Thread.

Thread: <https://hackforums.net/showthread.php?tid=6073438>

I had made a business where i was living and i needed my Website to rank to the #1 Page of Google and i said to myself Mr Blade has a decent rep and he seemed like a liked bloke on HackForums. So i went and i decided to contact him on Skype, We started talking and i told him what i wanted from him exactly and he told me he was able to do it and promised me it. Now i am a family man so starting this business is really hard and i have to work to feed my family. I told Mr Blade look i'm more than happy to go to the best package but he advised me to go for the \$200BTC (USD) Package and i said okay and i decided to go ahead with it. I still thought Mr Blade was legitimate and i continued to go with him i gave him my Web hosting login details i gave him everything he needed. I told him that someone had scammed me previously where i purchased reviews and they didn't fulfill their promises and the next day that person refunded me. I continued with Mr Blade as he seemed okay and he told me to put 45 days in the contract because of Corona Google isn't ranking and they're delaying it. So i gave him the benefit of the doubt and did as he said. 45 days go past and no results.

I then tell him brother was is going on man, I gave you so much money USD compared to Australian Dollars is a crazy jump as the currency is a little bad. I was like bro come on you can't do this i want results all this time and i gave you and you wasted my time. He came with the excuse his VPS wasn't working bla bla. He was like i'm going to give you a key to the software and all you have to do it let it run and i was like okay. He made me download some software called "GSA Search Engine Ranker". Which is a scam and a complete waste of time. He team viewed me and he did the process and he put the key for the software and logged off team viewer. I then message him and i'm like brother can you set up the GSA Software its bullshit how can you not know how to set it up. Like you can't just leave me empty handed. I payed you for a service to do and your making me do this? Like see how i'm being kind and good to him but this guy is a complete scammer. Anyway he jumps on does a few things. He sends me videos and links to show me how to set it up and they do no help. Anyway I clicked start on the software and i was like to him bro its doing shit from different countries I need Australia. Not overseas. But he doesn't help anyway. Now i caught him out and i told him look i want a refund you scammed me and he tells me this corona virus is serious where i am and i can't do anything please pray for me. I'm like what the fuck. You can't do this to me. I think start researching him up on hackforums and i see a person who made a thread about him and Mr Blade gave him the excuse of, "He then says sorry there was a rain issue where he lives twice:". Guys i am telling you this guy is a scammer do not buy anything from him and i lost \$200 USD where i have a family i have to feed and i hope Mr Blade does refund me and i hope that karma gets him where he loses his entire life saving and his future opportunities because his a filth, a scammer, a person who doesn't know how hard it is to make a living and a cunt.

The thread: You guys should really really read: "He then says sorry there was a rain issue where he lives twice:"

Almost 5 months and no delivery by the seller?

I'm sorry for your loss OP. Don't think the seller is planning to refund at this point and he hasn't been online for 2 weeks...
