Thread: [Any new coins to mine](#)

UndergroundLogic - September 27, 2020, 7:31 am

That I could get a nice supply off purely by mining with my 1080ti, that could who knows explode in 5 years

mindshift5 - September 27, 2020, 7:41 am

Why not just partake in a master node?

You will need to research on which coin to buy and then stake.. it's a passive source of income

Thanks for replying mate, I won't pretend I know everything, is there a good source where I can read about partaking in a master node, would love to get in to staking

mindshift5 - September 27, 2020, 7:54 am

Kindly check out masternodes.online

You can get started from there

Check YouTube for how to use the site

So when holding the coin, you lose some value through inflation. Just like fiat.

When staking, you do 'earn' money similar to a high yield savings account.

Why isnt this income?

Quote:income

/Ink?m/

noun

money received, especially on a regular basis, for work or through investments.

(Sep 27, 2020 03:25 PM)Focus Broken Wrote: [\[CITE\]](#) The operation taking place is moving the decimal place to the right on your balance. This is not income, because there is a corresponding

unavoidable loss that occurs on the other side of the balance sheet which cancels out your earnings.

It is still better than inflation from fiat, because at least your inflation losses are balanced by new token gains. With fiat, the new token gains are exclusive to the central bank that prints it, so it's pure loss for anyone that holds it.

Thanks, so is there any new worth while coins to mine possibly
