Geass - September 27, 2020, 10:29 am

I asked one time if a green egg can give an Eagle in hackman game and was told no from the green.

Well I just got mine ?

You'll easily win an egg with 5 bytes but yeah I get your struggle. :P

Some people are asking 50 and 100 bytes times to times for a green haha

Edit: look on this post, got a green, third today, not worth the bytes in loterry for 40-50 bytes :(

Almost half an hour left, don't miss your chance for this amazing smurfs egg

jecoylecoy - September 28, 2020, 8:43 pm

I buy a lot of tickets for green egg lottery before then hatched it one by one to get a freagle. Luckily out of 35 eggs I got 1 freagle HUM.

I haven't try it out to get a Freagle out of green eggs...lately I always hatched hums from the red eggs.

Maybe I should try to hatch a green one and hoping to get a Freagle out of it :D

Bro you can use the invisibility potion that you can purchase on the shop to hide your hum so it will not be killed.

Yes., bro. Recently, one of them told me to do so. But unfortunately, after I activated the potion, I started attacked a HUM. So my potion effectiveness gone. I should be aware of it next time.

I am upgrading it, adding more green eggs into freagle to make it stronger and people bypass it ^.^

Yeah you should be much more aware of that the next time.

We all have gone on that process but we learned our lesson even when feeding be sure to make us of the recipe book so it will not cost you too much when feeding.
