Thread: [Need Help Making a Bad Twin Hotspot Network](#)

luuca - September 28, 2020, 12:27 pm

In public places in Germany there is government-offered WLAN Hotspots. How can i mimic the Hotspot efficiently (ESP8266? P4wnp1?) and capture data?

grinchdrag - October 11, 2022, 2:45 pm

there is government-offered WLAN Hotspots,

nice

and you still believe in the sandmännchen

1.

there are NO government-offered WLAN Hotspots

2.

it takes 10 seconds to build a accesspoint with any ssid and mac

There's Wi-Fi Pumpkin. But if these are open hotspots, the easiest method (and least likely to raise suspicion) is to sniff packets with monitor mode.

Have you been to Germany? In my city in Wisconsin, there are municipal hotspots, which are government-owned.

I have a tutorial for making a rogue ap [here](#) and capturing packets and analyzing in wireshark.

and there's also a good one in the tutorial section right now
