Vouches:

(Oct 2, 2020 07:37 PM)90mh Wrote: [\[CITE\]](#) Simplicity gave me a vouch copy for his eWhoring ebook. I have a lot of experience eWhoring and have ran a [BRAND NAME REMOVED] service on here before.

The Introduction:

Personally I thought the introduction to eWhoring was nice as he provided a Q&A for people that might be new to the eWhoring scene. Everything stated in the Q&A was true and I made sure to check over it. He also talks about what it is and how it works.

Traffic:

The traffic section was nice as he provided websites to spread your username out on to get you adds but I let him know ways to update his section and to provide more information on this topic. I'm sure he'll be implementing new Traffic ways soon. But he does explain how to obtain traffic and it will work as I have used these traffic methods before.

Social Engineering:

He provides a nice debrief going into the Social Engineering section of the eBook and it gives you a nice perspective on how to use it and what it does. He explains it very well for beginners and even for experts. He also shows ways to use Social Engineering to your advantage and I also showed him some things he can add to this section to reinforce his ideas. Other than that this section is spot on and really helps the reader with their eWhoring adventure.

He also provides tips and tricks at the end that even I didn't know about and will be using in the future. There are also ways to triple your profits that you may have not known about! Thank you for this vouch copy Simplicity and he is also providing mentorship which is a steal so I'd recommend picking up a copy today.

(Oct 11, 2020 04:33 PM)isu Wrote: [\[CITE\]](#) I've been lucky enough to be asked to review the ebook. Thank you for the vouch copy, Simplicity.

The ebook consists of 16 pages and 4426 words overall.

The first section covers the definition of eWhoring and a small legal analysis of it. Later on, the author guides you through creating an identity, picking a pack and choosing traffic sources. My favourite thing which I haven't seen in any other eWhoring ebook is that author describes real-life social engineering techniques and how they can be used while talking to your client in order to maximize the profits.

Next chapters guide you through properly chatting with your customers and different ways to receive the money as well as filter out the timewasters.

The next part describes scaling and automating the business and how to avoid your accounts getting linked. It contains multiple links and resources with detailed descriptions.

The last and my favourite part is dedicated to social engineering. It shows you multiple detailed methods on "double-dipping" and more. The author also includes a long list of possible objections and how to convert them into paying customers.

In the end, there are 4 different bonus methods with less known websites that allow you to make more money from your customers - I don't know if I'm allowed to reveal more, but they're golden.

To sum up, the current ebook price is nothing compared to what you receive. I've seen multiple 20-100\$ eWhoring ebooks but none of them has been remotely close to this one, especially thanks to OP's understanding of social engineering.

(Oct 13, 2020 08:24 AM)Xen Wrote: [CITE](#) I've had a good read through it and I must say this is one of the most thought out ebooks I've read in a while.

I'm not going to go through and explain what each section contains because, in my opinion, it really is something you have to purchase to get a full grasp on what Simplicity is offering. It's very well written and even for me (someone who has never done ewhoring properly before) I can say that each section is incredibly easy to read and everything makes sense, making each step/piece of advice easy to understand.

Simplicity is always online on Discord and is willing to help so you can assure if you need any advice or tips, he'll be there.

There are some additional methods included that will help you with your ewhoring endeavors but I've actually found the majority of them useful for things outside of ewhoring also which is also a bonus.

Interested, Just wondering if I could do it to targeted countries such as New Zealand as there isn't much in the way of "eWhoring" these ways. If you could also provide some more info I could take a look at. I'd be sure to pay a payment.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
