Thread: [Constant way to make \\$200-\\$500 a day ?](#)

**stuartlittle1** - October 1, 2020, 5:33 pm

Hello guys,

Its been really tough on me making money daily, I have tried all kinds of things to find out you either get blocked or banned somehow then you cant make money. I have my 9-5 and I really want to learn a constant way to make \$200-\$500 a day so I can have more time to focus on bigger projects. I know this is not your problem but I hope someone can help with this.

Everything seems to be so promising but ends up not working, i am not asking to get rich just enough a day to pay my day to day bills. We all have daily expenses that need to be done like gas, meals, coffee etc.

Hope you understand and thank you very much in advance, feel free to PM if you dont want to show everyone thats fine I can even give you first couple of weeks profits if it really works.

Curious to where you live that you need 200-500 a day to pay your day to day bills.

#Dropshipping

Find a harry potter instagram page that sells shoutouts, setup a shopify store and search on aliexpress for a product that harry potter fans might be interested in. Important: there should be NO "harry potter" phrase on there because then you get sued.

#Youtube (My Favorite)

Find a niche that looks promising to you and research what video type you could make, then find a way to make it easy and find out how to build a channel up, let me tell you this would be perfect long term and you get money every day. I do it myself.

This is really nothing at all actually. He states he works a 9-5 as well. Depends where he lives as well as so many other factors too; to answer his question.

From what I understand, the OP wants to just have a side hustle doing online monetization like much of us. There's really no easy answer to this question. All you need to do is find a need or idea by being creative. (and there's many niches if you research properly and take your time, I am not going to do that for you but a user above me mentioned a few methods you may want to look into). Branching your service(s) out across multiple online social media platforms is also super important. Getting your name or product or whatever it is out there for people to see.

Depending on your skillsets in real life, you should be able to figure out what works best for you. But remember to always think outside the box. Many members on HF who are looking to make quick

money like this end up falling into traps and get scammed or just end up wasting their money with these get rich quick schemes that 50% of the time are BS. Sometimes you do have to spend money in order to make money, but you should do it very wisely.

Also if you have the time and resources; cryptocurrency investing and trading is fairly profitable depending on if you know what you are doing. Day-trading I am not a fan of, however. You could also combine a bunch of monetization techniques into one depending on your multi-tasking skills. A lot of people miss the point and get stuck on one single method. That's fine and all, but once you completely have it on autopilot and can manage it without it taking up much of your day, you can move onto a new project.

Building connections IRL and utilizing your personality to your benefit to increase the amount of people you encounter is important too. Business cards and bars are your best friends.

Good luck!

Thank you very much for your response I highly appreciate this. Yes I understand I am still looking to see what side hustle will work, i have tried betting I did turn \$1,700 into 14k in three days but then lost it all because I got greedy didnt liek that anymore because Its a straight up gamble. I want something bringing in at least \$200 a day everyday as long ass I put in the work.

**juulstar** - October 2, 2020, 9:14 pm

there is no legal way to just make .5k consistently everyday immediately with no prior knowledge

your best bet is to pursue higher education if you want to enter any field and just make money immediately without being locked up.

**consultantyo**hi - October 11, 2020, 11:18 am

Making \$500 a day isn't an issue.

The real problem is are you willing to work towards it if given the right methods?

**archaic** - October 18, 2020, 5:59 pm

If you are good at designing and web development get into CPA. Currently making \$150 a day autopilot. I don't know how long it will last but its been a cpl weeks now and I'm hoping to pay off my college with it haha
