Thread: [Tamper Doesnt Exist](#)

cloudz4me - October 1, 2020, 10:03 pm

noob question

i tried lots of tampers but some of them wil return doesnt exist ..it does means they are not in default list of sqlmap and i should add bymyself?
if yes where i can find a complete/latest list of tampers so i can add them .

thanks.

G.P.D. - October 1, 2020, 11:46 pm

There is a list of all tampers provided by sqlmap :

Code

```
tamper=apostrophemask,apostrophencode,base64encode,between,chardoubleencode,charen  
code,charunicodeencode,equaltolike,greatest,ifnull2ifisnull,multiplespaces,nonrecursivereplacement  
,percentage,randomcase,securesphere,space2comment,space2plus,space2randomblank,unionallto  
union,unmagicquotes
```

Which version of SQLMap you're using ?

niqscann - October 11, 2020, 3:03 am

if u use with windows simply download zip file from sqlmap and extract , tampers there.

if u use linux git clone will get all tampers again.

just chk tamper file is there or not...
