Thread: [SILENT .DOC EXPLOIT | FUD | PRIVATE](#)

nCuX0 - October 2, 2020, 6:49 am

(thread design coming soon)

- based on CVE-2017-11882 & CVE-2017-8570 & CVE-2018-0802
- bypasses Protected View, smart screen, windows defender real-time protection and cloud-protection
- weight of the exploit itself: 900kb-2mb, depending on your content inside
- fully undetectable runtime/scantime
- unlimited builds
- attachable on gmail/yahoo/hotmail
- ability to embed decoy content
- regular updates during subscription
- supported Microsoft Office (32/64 bits): 2007,2010,2013,2016

1150 \$ / one month

800 \$ / one month(returning customer)

this exploit bypass protected view, no need to click "enable editing", its silent and im not selling builds, only licensed builder

k1ng0f0th1ng - October 8, 2020, 12:08 pm

How clean it on runtime? Could you provide any results?

Bitsoldier120 - October 8, 2020, 9:00 pm

Looks good, is it chunky like most silent exploits ive seen here? your posts seem to know what youre doing

zelus - October 9, 2020, 3:07 am

This is straight foward

No fancy graphics and write ups

Its for only serious people that really need it

Am looking forward to getting this soon

GLWS

Question:

1. Does the builder come with all the CVE or one have to chose?
2. Would you have to chose the CVE to use in each build or can one use 2 or more CVE on a document (Have seen a public tool that combines CVE-2017-11882 & CVE-2018-).

Just to know because bypassing protected view and cloud protection is actually the selling the point and major reason am going to buy

mas3439035 - October 9, 2020, 8:47 am

@zelus Nice Question

three exploits embedded in one document

(Oct 8, 2020 12:08 PM)k1ng0fn0th1ng Wrote: [\[CITE\]](#) How clean it on runtime? Could you provide any results?

its fud but im not gonna provide link to scan, unless you are convinced and ready to buy

Stanley - October 11, 2020, 1:51 am

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

Softw4re - *October 11, 2020, 4:55 am*

sounds interesting! do you offer builds or only monthly builder?
