Thread: [Making Money with E-Sport Betting! \(BETTING ON LOL WORLDS 2020\)](#)

Vezo - October 6, 2020, 12:20 pm

This is a risky way of making money - Only invest to the method with what you can lose!
If you are easily addicted to stuff then pls don't follow this thread.

This group is also a great community, we speak in chat and you buy and sell bitcoin and more :)

This is a method where you follow other peoples betting signals who already has proven previous results. It's still very important to do your own research before making bets since any bet can lose even if the odds is in the other teams favour!

previous results:

As you can see in these results, losses happens and should not be any suprise! The most important thing when is to keep an 60-70% WINRATE to always be able to increase your balance.

Step 1: Joining the discord group!

[Curiosity Signals](#)

If you decided to join any of these groups, tell them Vezo sent you :) :fagit::love2::gold:

Curiosity costs 20 euro/month - Open a ticket to speak with a moderator/admin.

I'm "Vezo" in this group.

Here is how it looks when you get signals posted in Curiosity Signals:

Many of the bets/signals which are from Curiosity Signals are from live bets right when the game/match is going on so you need to stay active for MOST of the bets!

After you have joined these Discord Group you need to join the betting sites that we use so you get the same games/matches we use.

[/esportwebsite2\]MAIN BETTING SITE!](#)

[/esportwebsite\]ALTERNATIVE BETTING SITE](#)

After signing up with both websites it's important to decide how much you want to play with and then deposit them with what website you choose.

All of the betting sites allows Bitcoin Deposits so you can do this easy and anonymous if you want!

We now have joined 1 discord group and also joined 1-2 sport/e-sport betting sites and are ready to get started.

From what I've found out when betting is to always stick to 7-10% of your balance each bet you make (OR EVEN LESS depending on how risky the bet is!) ALWAYS do your own research about the teams who are playing.

NEW RESULTS:

I've done some betting on these games/matches only from my own research and now I'm up like 30% balance atm.

Some of my results:

100 coins = 1 euro

If you can keep betting on 1.6-2.0 odds games and keep a 60-70% winrate you will always be increasing your balance. This was my yesterdays games and that increased my balance substantially!

Vezo - October 7, 2020, 12:23 pm

Hello guys, today we had a good day! We won 2/2 bets and i netted a 46\$ profit from those two games! Here are some pictures of it.
